Braswell, 2014-10-14 The archaeological sites of Mexico's Yucatan peninsula are among the most visited ancient cities of the Americas Archaeologists have recently made great advances in our understanding of the social and political milieu of the northern Maya lowlands However such advances have been under represented in both scholarly and popular literature until now The Ancient Maya of Mexico presents the results of new and important archaeological epigraphic and art historical research in the Mexican states of Yucatan Campeche and Quintana Roo Ranging across the Middle Preclassic to the Modern periods the volume explores how new archaeological data has transformed our understanding of Maya history The Ancient Maya of Mexico will be invaluable to students and scholars of archaeology and anthropology and all those interested in the society rituals and economic organisation of the Maya region National Trade and Professional Associations of the United States, 2006 *The Lipid Handbook, Second Edition* Frank D. Gunstone, John L. Harwood, Fred B. Padley, 1994-07-21 A great deal of research has been carried out on this important class of compounds in the last ten years To ensure that scientists are kept up to date the editors of the First Edition of The Lipid Handbook have completely reviewed and extensively revised their highly successful original work The Lipid Handbook Second Edition is an indispensable resource for anyone working with oils fats and related substances Edible Fats and Oils Processing David R. Erickson, 1990 **Quaternary Environmental Change in the Tropics** Sarah E. Metcalfe, David J. Nash, 2012-08-24 The global climate changes that led to the expansion and contraction of high latitude ice sheets during the Quaternary period were associated with equally dramatic changes in tropical environments These included shifts in vegetation zones changes in the hydrology and ecology of lakes and rivers and fluctuations in the size of mountain glaciers and sandy deserts Until recently it was thought that such changes were triggered by fluctuations in the distribution of polar ice cover Now there is increasing recognition that the tropics themselves have acted as drivers of global climate change over a range of timescales The aim of Quaternary Environmental Change in the Tropics is to provide a synthesis of the changes that occurred in tropical terrestrial and marine systems during the Pleistocene and Holocene complementing data derived reconstructions with output from state of the art climate models It is targeted at final year undergraduate students and research specialists but will

provide an introduction to tropical Quaternary research for a variety of other readers *Global Financial Stability Report, April 2017* International Monetary Fund.
