**Global Strategic Trade Management** Rajiv Nayan, 2019-02-26 This book examines whether India is successfully integrating and adapting to the global strategic management system It offers essential insights into the evolution of export controls for goods which may have implications for the development of Weapons of Mass Destruction an aspect that is especially relevant given India's robust biotechnological chemical and nuclear industrial base In security

studies the phrase strategic trade management is now slowly replacing the phrase export control. However, for the policymaking community, export control remains popular at least for the sake of reference. The book also describes the mechanisms India is adopting in this regard. It demonstrates the shift in the Indian approach to strategic trade management from an outspoken critic to a supporter. Politically, the country was initially skeptical of the idea of export controls because it was a target of such systems. The book also explains the tools, forces, and incentives that moved India to adapt its policy on export controls or strategic trade management.

**Law and the Arms Trade** Laurence Lustgarten, 2020-09-03 This ground-breaking book offers an extensive legal analysis grounded in public, EU, and international law of arms trade regulation, integrated with insights drawn from international relations. The sale of weapons and related technologies is globally one of the most politically controversial and ethically contentious forms of commerce. Intimately connected with sustaining repressive governments and violations of international human rights and humanitarian law, arms exports are also a central element in the economic and strategic policies of the governments of all large industrial states. They have also been the source of abundant corruption and of serious challenges to the norms and effectiveness of constitutional accountability in democratic states. On paper, the arms trade is heavily regulated; national legislation and international treaties are in place which purport to prohibit certain transactions and limit others. Yet despite its importance, legal and international relations scholarship on the subject has been surprisingly limited. This book fills this gap in the literature by examining and comparing the export control regimes of eight leading nations: USA, Russia, the UK, France, Germany, Sweden, China, and India, with chapters contributed by leading experts in the field of law and international relations.
