Jaeger, J. David Tàbara, Julia Jaeger, 2011-06-28 This book provides the reader with a state of the art view of research on sustainable development Its emphasis lies on the transformative dimension of this research sustainable development can only be realized through a far reaching transformation of the situation humankind finds itself in at the beginning of the third millennium The contributions are written by leading world experts in the conceptualisation and actual practice of sustainable development The book provides a timely overview of ideas and methods as well as a variety of original learning examples on the most innovative approaches on sustainability science Protecting the Global Civilian from Violence Timo Kivimäki, 2021-05-10 This book reveals why the UN is more successful than unilateral great powers in protecting civilians from violence and focuses on the discourse development and consequences of UN peacekeeping Analysing statistics of state fragility and fatalities of violence

it reveals that the UN has managed to save tens of thousands of lives with its peacekeeping a surprising statistic given the media consensus about the UN's powerlessness and inefficiency Using computer assisted discourse analysis of resolutions from the UN Security Council 1993-2019 the book offers data that describe the character and development of UN approach to the protection of civilians from violence It then links the data to the statistics of conflict fatalities and state fragility to reveal by means of qualitative and quantitative analysis when where how and why the UN has been successful at protecting civilians Two reasons for the UN's success are highlighted in the book as being statistically most significant First the organization offers local ownership to peaceful solutions by considering conflicting parties as the primary agents of protection Second the UN approach is much less power oriented than unilateral approaches by the great powers protection for the UN does not mean deterrence or destruction but rather support for local protectors of civilians However strong great power influence on such operations tends to weaken UN's ability to save lives This book will be of much interest to students of humanitarian intervention peacekeeping human rights and International Relations in general *Forensic DNA*
