Distance Learning for Elementary STEM Amanda Thomas (Math professor), 2020 This practical guide outlines a vision for online and distance STEM learning at the elementary level with creative activities based on eight STEM themes Online and

distance learning may sound fairly straightforward. Instead of learning in a classroom setting, students learn at home with the assistance of online resources. But classroom learning does not always translate easily to online settings, particularly at the elementary level where children should be actively engaging in activities, exploration, and discussion. For STEM subjects, integration across subjects, settings, and play-based versus traditional learning present opportunities for young learners to engage in age-appropriate online and distance learning. This book features eight creative integrated STEM lessons, including ideas for designing a zoo, learning to garden, exploring the night sky, and more. Each lesson offers online, traditional, and hands-on components with connections to the ISTE Standards and STEM standards across elementary grades. Concluding with a model for designing online and distance STEM learning for elementary-aged children, this book will support teachers and parents in designing the types of resources and learning experiences they need for elementary students' distance learning.

A Year of Themes Sarah Clark, 2003. Familiar stories and rhymes immerse children in written and spoken language while building content area skills. Complete lesson plans are provided for centers, journals, games, art, and drama activities, literature, and more.

How to Plan Rigorous Instruction (Mastering the Principles of Great Teaching series) Robyn R. Jackson, 2011-01-15. If we want all our students to become better thinkers and learners, we must design rigorous learning experiences that go beyond helping them simply master standards. In this guide, Robyn R. Jackson takes you step by step through the process of planning rigorous instruction: what great teachers do to ensure students have a learning destination that's worth working toward and that the path they take to get there will help them pass the big tests and become engaged learners, effective problem solvers, and critical thinkers. Here you'll learn how to create a rigorous unit assessment to guide your instruction and ensure standards mastery. Select rigorous learning materials by examining the type of thinking you want students to engage in and the type of understanding you want them to acquire. Choose rigorous instructional strategies by looking at ways to help students grasp new content and acquire new skills; apply what they are learning in a meaningful way; use thinking processes to synthesize new understandings and adapt these understandings to new contexts across disciplines. Create a rigorous learning unit tailored to your standards and classroom content and to the students you teach.

Fundamentals, Sensor Systems, Spectral Libraries, and Data Mining for Vegetation Prasad S. Thenkabail, John G. Lyon, Alfredo Huete, 2018-12-07. Written by leading global experts including pioneers in the field, the four-volume set on *Hyperspectral Remote Sensing of Vegetation*, Second Edition, reviews existing state-of-the-art knowledge, highlights advances made in different areas, and provides guidance for the appropriate use of hyperspectral data in the study and management of agricultural crops and natural vegetation. Volume I: *Fundamentals, Sensor Systems, Spectral Libraries, and Data Mining for Vegetation* introduces the fundamentals of hyperspectral or imaging spectroscopy data, including hyperspectral data processes, sensor systems, spectral libraries, and data mining and analysis, covering both the strengths and limitations of these topics. This book also presents and discusses hyperspectral narrowband data acquired in numerous unique spectral bands in
