Sales on the debit side of the Cash Book d Departmental columns in the Sales Book and in the Purchase Book Controlling
Accounts The addition of special columns in books of original entry makes possible the keeping of Controlling Accounts The
most common examples of such accounts are Accounts Receivable account and Accounts Payable account These summary
accounts respectively displace individual customers and creditors accounts in the Ledger The customers accounts are then
segregated in another book called the Sales Ledger or Customers Ledger while the creditors accounts are kept in the
Purchase or Creditors Ledger The original Ledger now much reduced in size is called the General Ledger The Trial Balance
now refers to the accounts in the General Ledger It is evident that the task of taking a Trial Balance is greatly simplified
because so many fewer accounts are involved A Schedule of Accounts Receivable is then prepared consisting of the balances
found in the Sales Ledger and its total must agree with the balance of the Accounts Receivable account shown in the Trial
Balance A similar Schedule of Accounts Payable made up of all the balances in the Purchase Ledger is prepared and it must
agree with the balance of the Accounts Payable account of the General Ledger The Balance Sheet In the more elementary
part of the text the student learned how to prepare a Statement of Assets and Liabilities for the purpose of disclosing the net
capital of an enterprise In the present chapter he was shown how to prepare a similar statement the Balance Sheet For all
