

Reading a Solubility Chart

- 1) The curve shows the # of grams of solute in a saturated solution containing 100 mL or 100 g of water at a certain temperature.
- 2) Any amount of solute below the line indicates the solution is unsaturated at a certain temperature
- 3) Any amount of solute above the line in which all of the solute has dissolved shows the solution is supersaturated.
- 4) If the amount of solute is above the line but has not all dissolved, the solution is saturated and the # grams of solute settled on the bottom of the container = total # g in solution - # g of a saturated solution at that temperature. (according to the curve)
- 5) Solutes whose curves move upward w/ increased temperature are typically solids b/c the solubility of solids increases w/ increased temperature.
- 6) Solutes whose curves move downward w/ increased temperature are typically gases b/c the solubility of gases decreases with increased temperature.

Solubility Problems

1. Which of the salts shown on the graph is the most soluble in water at 10°C? **KI**
2. At what temperature is 90g of NaNO₃ a saturated solution in 100grams of water? **≈ 23°C**
3. A solution has 70grams of KNO₃ and is unsaturated, what is the minimum temperature? **46°C**
4. At 20°C, a saturated solution of KClO₃ is created in water. How many grams of potassium chlorate must be added to saturate the solution at 50°C? **12g**
5. Which of the salts shown on the graph is the least soluble in water at 10°C? **KClO₃**
6. Which of the salts shown on the graph has the greatest increase in solubility as the temperature increases from 30 degrees to 60 degrees? **KNO₃**

Popular Science Monthly ,1927 Biochemistry of Silicon and Related Problems Gerd Bendz,2013-06-29 Silicon chemistry was initiated in 1823 by Berzelius who prepared elemental silicon In many ways silicon was considered a typical opposite of carbon although the two elements are closely related as to their electronic structure both having four valence electrons The properties of their compounds are however extreme ly different Both form extended structures but in different ways carbon by covalent carbon carbon bonds silicon by polar silicon oxygen silicon bonds The complex carbon compounds are integral parts of all living matter plants and animals The corresponding silicon compounds build up a major part of dead matter soils and minerals As recently as twenty years ago the title of this Symposium BiOChemistry of Silicon would have been considered as contradictio in adjecto However the development in the field has during the past fifteen years been overwhelming and has convinced us that silicon is a necessary element in the life processes for animals as well as for plants Interesting therapeutical uses have been suggested but we have also become increasingly aware of serious occupational diseases asbestosis and silicosis and of possible cancerogenic effects It is our hope that this volume will give some idea about various aspects of silicon compounds which were discussed during the Symposium

Formulation Simplified Mark J. Anderson,Patrick J. Whitcomb,Martin A. Bezener,2018-04-17 Many chemists especially those most brilliant in their field fail to appreciate the power of planned experimentation They dislike the mathematical aspects of statistical analysis In addition these otherwise very capable chemists also dismissed predictive models based only on empirical data Ironically in the hands of subject matter experts like these elite chemists the statistical methods of mixture design and analysis provide the means for rapidly converging on optimal compositions What differentiates Formulation Simplified from the standard statistical texts on mixture design is that the authors make the topic relatively easy and fun to read They provide a whole new collection of insightful original studies that illustrate the essentials of mixture design and analysis Solid industrial examples are offered as problems at the end of many chapters for those who are serious about trying new tools on their own Statistical software to do the computations can be freely accessed via a web site developed in support of this book
