task types on both intake and acquisition of two English grammatical structures The study used various measures to determine intake as well as the development of both implicit and explicit knowledge The results of the study support the claims made for the benefits of Focus on Form but do not support the claims made for the benefits of more explicit types of instruction Further the results show that there is no direct relationship between intake and acquisition and that different task types can have a differential effect on immediate task performance on the one hand and learning on the other The book discusses these findings in the light of previous research and considers their implications both at the theoretical level and for language teaching practice
