## CIRCUMFERENCE OF CIRCLE WORD PROBLEMS

### CIRCUMFERENCE APPLICATIONS

Quicker Notes

### ESSENTIAL QUESTION

How can I use the circumference formula to solve problems?

### CIRCUMFERENCE & PROBLEM SOLVING

- Circumference is the distance around a circle.
- To solve problems involving the circumference of circles, list out the given information. Then, use one of the following formulas to find the circumference to solve the problem/what the question is asking for.

$$C = \pi d \text{ or } C = 2\pi r$$

1. Javier measures the length of the radius of the clock in his math classroom. His teacher is going to give a ribbon around the edge of the clock. What is the length of the ribbon that his teacher gave around the clock?

$$\begin{aligned} C &= \pi d (2.53) \\ C &= \pi r \\ C &= 3.14 \times 24 \\ C &= 75.36 \text{ in} \end{aligned}$$

2. Jeremiah gets in an oversized circle pool at his backyard. The diameter of the pool is 12 feet. What is the length, in feet, around the edge of the pool?

$$\begin{aligned} d &= 12 \\ C &= \pi d \\ C &= 3.14 \times 12 \\ C &= 37.68 \text{ ft} \end{aligned}$$

If the diameter of a penny is about 0.75 inches, how long is the line drawn on Braden's paper?

$$\begin{aligned} d &= 0.75 \\ C &= \pi d \\ C &= 3.14 \times 0.75 \\ C &= 2.355 \text{ in} \end{aligned}$$

Number of rotations traveled in 2.5 rotations of the wheels?

$$\begin{aligned} r &= 40 \text{ mm} \\ C &= 2\pi r \\ C &= 2(3.14)(40) \\ C &= 3.14 \times 80 \\ C &= 251.20 \\ C &= 251.20 \end{aligned}$$

3. Jan from Perfect Pastries decorated a circular cookie cake that had a diameter of 12 inches by using purple icing around the edge of it. A customer wants the same decorations, but with a cookie cake that has twice the diameter as the original one. How many inches of frosting will Jan need for this customer's cake?

$$\begin{aligned} d &= 2 \times 12 \\ d &= 24 \\ C &= \pi d \\ C &= 3.14 \times 24 \\ C &= 75.36 \text{ in} \end{aligned}$$

4. A tire from Connor's car has a diameter of 28 inches. What is the distance traveled after 2.5 rotations of the tire?

$$\begin{aligned} d &= 28 \\ C &= \pi d \\ C &= 3.14 \times 28 \\ C &= 87.92 \text{ in} \\ C &= 87.92 \text{ in} \end{aligned}$$

in the U S Military but the thought of taking the ASVAB AFQT is having you seeing stars and stripes this test prep guide offers 1 001 practice opportunities to increase your chances of scoring higher Covering the four subtests 1 001 ASVAB AFQT Practice Questions For Dummies helps you strengthen your test taking muscles so you can perform your very best on the big day and qualify for the military branch and job you want Since the test was first introduced in 1968 more than 40 million people have taken the exam If you want to join the ranks and go on to enjoy a fulfilling and prosperous career in the Air Force Army Marines Navy or Coast Guard it s essential that you achieve a passing score on the ASVAB AFQT the first four sections of the ASVAB All the expert test taking tips strategies and practice questions you need to do just that are a page away Includes free 1 year access to practice questions online Provides detailed answers and explanations for every question Covers everything you can expect to encounter on exam day Offers tips for using your time wisely If red white and blue are in your blood the 1 001 practice questions inside will help you pass the ASVAB AFQT with flying colors

The Nature of Mathematical Thinking Robert J. Sternberg, Talia Ben-Zeev, 2012-10-12 Why do some children seem to learn mathematics easily and others slave away at it learning it only with great effort and apparent pain Why are some people good at algebra but terrible at geometry How can people who successfully run a business as adults have been failures at math in school How come some professional mathematicians suffer terribly when trying to balance a checkbook And why do school children in the United States perform so dismally in international comparisons These are the kinds of real questions the editors set out to answer or at least address in editing this book on mathematical thinking Their goal was to seek a diversity of contributors representing multiple viewpoints whose expertise might converge on the answers to these and other pressing and interesting questions regarding this subject The chapter authors were asked to focus on their own approach to mathematical thinking but also to address a common core of issues such as the nature of mathematical thinking how it is similar to and different from other kinds of thinking what makes some people or some groups better than others in this subject area and how mathematical thinking can be assessed and taught Their work is directed to a diverse audience psychologists interested in the nature of mathematical thinking and abilities computer scientists who want to simulate mathematical thinking educators involved in teaching and testing mathematical thinking philosophers who need to understand the qualitative aspects of logical thinking anthropologists and others interested in how and why mathematical thinking seems to differ in quality across cultures and laypeople and others who have to think mathematically and want to understand how they are going to accomplish that feat
