

Enhanced Blending

The active brush uses the Enhanced Layer Blending technology. Blending controls determine how a brush covers color to the paper and blends with underlying colors. Whether you are painting on a layer with one color or blending two or more colors, Enhanced Layer Blending helps you create brushstrokes without white fringes.

Brushstrokes without (left) and with Enhanced Layer Blending (right)

- To access and adjust Blending settings, click **Window > Brush Control Panels > Blending**.

- Blend** lets you control how much the brush colors cover underlying colors, including the paper color. When **Blend** is higher than **Resaturate**, more color blends than covers, so the stroke never reaches full opacity.
