

A REFLECTION PAPER ON TEACHING FOR UNDERSTANDING

Submitted to Dr. ERNIE GRIO

Course: SCHOOL PROGRAM DESIGN

Submitted by Reynante R. Malano - ELP

Teaching for Understanding was first introduced to me during some discussion on UbD in my masters. As a grade school teacher, that sounded new to me as said framework was actually intendedly implemented for secondary schools years back. But with the insights I gained from my classmates' brainstorming and multitude exchanges of opinions, I was hooked on it and felt the need to introduce UbD to my colleagues in school.

When I first introduced it to some comrades most of them presumably thought that UbD has been around for some time but perhaps, they just hardly noticed it. They claimed that they must have been using it but it only hides itself with another name. With this discovery, I could only sway my head and insisted that Teaching for Understanding is not that stuff that they know, so to speak. Because of that, I arranged a schedule with my Quality Circle Group in the English Department so we could talk about it over a cup of coffee. There are only eight (8) of us in the group so said meeting was quite manageable and I really prepared to put my message across.

We started off informally by asking each one how the day went during the day. We exchanged answers to questions regarding knowledge, concepts and skills. We tried to discuss the definition of Understanding as against knowledge and skills. Answers were as varied and as complicated as they could be. Others even agreed that knowledge and understanding are one and the same.

Most of them use lecture as the only way to teach a certain topic. Some would just follow in toto the order of the Philippine Elementary Learning Curriculum (PELC). Some said that as long as they completed the minimum learning competencies, they might as well did well. So superficial an understanding, I must say.

Hence I discussed to them the UbD framework beginning with the wrong notion of teaching for understanding--- that tests are not the end-all of learner achievement; that memorizing facts, theories, and figures could only be starters to truly understand the truth and essentials of a theme; that learners
