**Chimpanzees, War, and History** R. Brian Ferguson, 2023 The question of whether men are predisposed to war runs hot in contemporary scholarship and online discussion Within this debate chimpanzee behavior is often cited to explain humans propensity for violence the claim is that male chimpanzees kill outsiders because they are evolutionarily inclined suggesting to some that people are too The longstanding critique that killing is instead due to human disturbance has been pronounced dead and buried In *Chimpanzees War and History* R Brian Ferguson challenges this consensus Bringing readers on a journey through theoretical struggle and clashing ideas about chimpanzees bonobos and evolution Ferguson opens new ground on the age old question are men born to kill

**Wild Man from Borneo** Robert Cribb, Helen Gilbert, Helen Tiffin, 2014-01-31 *Wild Man from Borneo* offers the first comprehensive history of the human orangutan encounter Arguably the most humanlike of all the great apes particularly in intelligence and behavior the orangutan has been cherished used and abused ever since it was first brought to the attention of Europeans in the seventeenth century The red ape has engaged the interest of scientists philosophers artists and the public at large in a bewildering array of guises that have by no means been exclusively zoological or ecological One reason for such a long term engagement with a being found only on the islands of Borneo and Sumatra is that like its fellow great apes the orangutan stands on that most uncomfortable dividing line between human and animal existing for us on what has been called the dangerous edge of the garden of nature Beginning with the scientific discovery of the red ape more than three hundred years ago this work goes on to examine the ways in which its human attributes have been both recognized and denied in science philosophy travel literature popular science literature theatre museums and film The authors offer a provocative analysis of the origin of the name orangutan trace how the ape has been recruited to arguments on topics as diverse as slavery and rape and outline the history of attempts to save the animal from extinction Today while human populations increase exponentially that of the orangutan is in dangerous decline The remaining wild men of Borneo are under increasing threat from mining interests logging human population expansion and the widespread destruction of forests The authors hope that this history will by adding to our knowledge of this fascinating being assist in some small way in their preservation

**Among Chimpanzees** Nancy J. Merrick, 2015-05-26 Foreword by Jane Goodall A former student and colleague of Jane Goodall shares stories of chimps and their heroes and takes readers on a journey to save man's closest relative Unbeknownst to much of the

public chimps are in trouble censuses show them to be extinct in four African countries and nearly so in ten others A large percentage of the remaining populations live in unprotected increasingly fragmented forests When Nancy Merrick learned these startling facts in 2009 she decided it was past time to discover the extent to which chimpanzees are at risk across Africa and what can be done Merrick had begun working with primates in 1972 as a young field assistant in Jane Goodall's famous Gombe camp Like the rest of the world at the time she was swept up in the excitement of discovering the remarkable world of chimpanzees their ability to fashion tools their dazzling intelligence and their complex relationships and societies From that moment on her human centered worldview shifted and she became a devoted advocate for our closest genetic relatives When Merrick returns to Africa decades later she's alarmed by how much has changed Human activity such as agriculture and logging has encroached on natural habitats throughout equatorial Africa endangering chimpanzees gorillas and bonobos In an effort to understand what we can do to save great apes Merrick connects with primatologists and conservationists who are trying to protect the last great forests Visits to some of Africa's parks sanctuaries and expanding agricultural areas reveal the urgency of the problems and the inspiration of the people leading the search for solutions Along the way Merrick demonstrates that the best hope for chimps and other great apes lies in connecting conservation to humanitarian efforts ensuring a healthy future for animals and humans alike Among Chimpanzees is at once an inspiring chronicle of Merrick's personal search to learn how chimps are faring across Africa and in captivity a crucial eyewitness account of a very critical period in their existence and a rousing call for us to join the efforts to be a voice for the chimpanzees before it's too late

**Before Humanity** Stefan Herbrechter, 2021-12-13 Before Humanity takes up the question of the post in the posthuman from the position of ancestrality Speculating about who or what comes after the human inevitably throws us back to our very beginnings The before in Before Humanity in this context takes on two meanings 1 what happened before we apparently became human which translates into a critical reading of paleo anthropology as well as evolutionary narratives of hominization 2 living through the end of a certain humanist anthropocentric notion of humanity what tasks lie before us which provokes a critical reading of the Anthropocene and current narratives of geologization In other words Before Humanity investigates conceptualizations of humanity and asks whether we have ever been human and if not what could or maybe what should we have been

**The Jane Effect** Dale Peterson, Marc Bekoff, 2015-01-19 In her nearly sixty year career as a groundbreaking primatologist and a passionate conservationist Jane Goodall has touched the hearts of millions of people The Jane Effect Celebrating Jane Goodall is a collection of testimonies by her friends and colleagues honoring her as a scientific pioneer an inspiring teacher a devoted friend and an engaging spirit whose complex personality tends to break down usual categories Jane Goodall is the celebrity who transcends celebrity The distinguished scientist who's open to nonscientific ways of seeing and thinking The human who has lived among nonhumans She is a thoughtful adult with depth and sobriety who also possesses a child's psychological immediacy and sense of wonder She is a

great scientific pioneer and yet her pioneering work goes far beyond producing advances in scientific knowledge The more than 100 original pieces included in this inspirational collection give us a sense of her amazing reach and the power of the Jane effect

**Rewilding Our Hearts** Marc Bekoff, 2014-10-20 In wildlife conservation rewilding refers to restoring habitats and creating corridors between preserved lands to allow declining populations to rebound Marc Bekoff one of the world's leading animal experts and activists here applies rewilding to human attitudes Rewilding Our Hearts invites readers to do the essential work of becoming reenchanted with the world acting from the inside out and dissolving false boundaries to truly connect with both nature and themselves
