

SETUP

1

To connect your unit, insert the USB cable through the bottom of the back of it into the host. Then attach the front by inserting the stand legs into the holes on the underside of the base unit.

2

Connect USB extension to a host USB port on your computer. A USB hub can be used but ensure that it can supply sufficient power (500 mA) to charge the device.

Alternatively, the device charger included can be used to connect the base unit to a USB extension. However, if that causes issues or interference problems, use "Powering on unit."

3

The optional AC charger can be used.

CHARGING

- 1 Host + external charge
- 2 External charge
- 3 Host + full charge

1. Only power-on charging mode

2. Supply power from the host to ensure the module is in correct position. Red charge indicator light is green and indicates when charging and will go off completely when fully charged.

AC charging mode

When your computer is powered off, the USB cable will not charge and the module needs to be re-positioned. Using the optional AC adapter will ensure your module charges correctly.

USB charging mode

When your computer is powered on, the USB cable will charge the USB extension.

POSITIONING

The [external antenna](#) operation allows to share data between the external positioning unit and base unit effectively.
