Reinventing The Curriculum New Trends In Curriculum Policy And Practice:

Reinventing the Curriculum Mark Priestley, Gert Biesta, 2013-06-20 Scotland's Curriculum for Excellence offers an example of a different approach to national curriculum development. It combines what are claimed to be the best features of top down and bottom up approaches to curriculum development and provides an indication of the broad qualities that school education should promote rather than a detailed description of curriculum content. Advocates of the approach argue that it provides central guidance for schools and maintains national standards whilst at the same time allowing schools and teachers the flexibility to take account of local needs when designing programmes of education. Reinventing the Curriculum uses Scotland's Curriculum for Excellence as a rich case study analysing the strengths and weaknesses of this approach to curriculum design and development and exploring the implications for curriculum planning and development around the world.

The BERA-Sage Handbook of Research-Informed Education Practice and Policy Dominic Wyse, Vivienne Baumfield, Nicole Mockler, Martin Reardon, 2025-06-19 One of the most pressing topics worldwide is how we can improve education to enhance people's life chances. The BERA Sage Handbook of Research Informed Education Practice and Policy 2 Vol offers an in depth exploration of the ways in which education research intersects with and can lead to improvements in education. Through detailed examinations of educational policies, practices, values and research methodologies, the handbook navigates the complexities inherent in educational systems and in so doing presents a unique new picture of education worldwide. Volume One of the Handbook set focuses on Understanding Research Informed Education and Volume Two focuses on how to implement it. Across six parts and fifty two chapters, the authors and editors explore a myriad of critical topics including using research to promote equity within education systems, rethinking pedagogy and knowledge mobilisation through practitioner led inquiry. New developments in aspects such as systematic approaches to research synthesis are presented by world leading experts. Authors of the chapters draw from many different sources to provide a comprehensive understanding of education including perspectives from the arts, humanities, natural sciences and social sciences. This understanding combines cutting edge education research and scholarship to provide insights into how education is enacted in countries and institutions through policy and practice. Featuring a truly diverse team of scholars to account for global perspectives, the BERA Sage Handbook of Research Informed Education Practice and Policy 2 Vol is an invaluable resource for scholars, researchers, students and practitioners who are interested in the new frontiers in education research, policy and practice. Volume One: Understanding Research Informed Education. Part One: Defining and Theorising Research Informed Education. Part Two: Methodological Debates in the Field. Part Three: International Comparison and Educational Policy. Volume Two: Implementing Research Informed Education. Part Four: Effective policy and practice in national contexts. Part Five: Curriculum, pedagogy and assessment. Part Six: Practitioners and learners as researchers.

This Companion will be an indispensable reference source for students, scholars and educators within the social sciences especially within management, organizational studies and sociology. It will also be highly relevant for those working and studying in the area of professional education.

Exploring Education and Childhood Dominic Wyse, Rosemary Davis, Phil Jones, Sue Rogers, 2015-06-05. Education has become dominated by testing standards, interventions, strategies and political policy. Yet while elements such as these are important, *Exploring Education and Childhood* contends it is childhood including its sociology and psychology that is the vital holistic context for teaching and learning. Written by a team of specialists who bring both experience of classroom teaching, teacher training and of rigorous research and scholarship, each chapter examines a topic that is of vital importance to teaching and the work of teachers. The book explores examples of educational practice that illuminate contemporary problems and future possibilities for education, develops educational theory to better understand practice and policy and critically evaluates education policy in the international context. With an emphasis on reflection and deep thinking, something that all the best teachers are able to do, key issues in the book include the voice of the child, metacognitive strategies, agency pedagogy and curriculum, performativity, standards and school readiness, educational settings and new technology, teacher expertise and agency, diversity and child agency, families, society and school choice. Illustrated with powerful examples of practice together with key questions for reflection and further reading, *Exploring Education and Childhood* challenges education professionals, policy makers and all people with an interest in education to envision a new future. It will be essential reading for all student teachers and teachers and is particularly appropriate for Masters level research professional studies.

Contemporary Issues in Primary Education Mark Brundrett, Gary Beauchamp, Paul Latham, Malini Mistry, Michelle Murray, Becky Taylor, Peter Wood, 2022-10-03. This book was developed as part of the celebrations for the 50th anniversary of the founding of the journal *Education* 33 which has always had primary education as its main focus. The journal has been published by Routledge since 2007 and is the most important academic publication in the field internationally. This book has been edited by a team of academics and senior practitioners all of whom are members of the Board of the journal or the Association for the Study of Primary Education which is the owning body of the journal. It will serve as an excellent resource to researchers and students of primary education. Topics include major contemporary issues such as key challenges in the field, learning and teaching.
