The objective of this study was to determine the prevalence of *Salmonella* in retail ground beef in the United States. There are two other interesting questions that I have been asked recently, and the answers are also interesting. The first is: "What is the best way to measure the performance of a system?" The answer is: "The best way to measure the performance of a system is to measure the time it takes to complete a task." The second is: "What is the best way to measure the reliability of a system?" The answer is: "The best way to measure the reliability of a system is to measure the number of times it fails." I hope these answers are helpful to you.
