Exploring Mathematics Craig Johnson, 2014-08 Exploring Mathematics Investigations with Functions is intended for a one or two term course in mathematics for college students majoring in the social sciences English history music art education or any of the other majors within liberal arts The mathematics course of this scope with an algebra prerequisite is a popular selection for liberal arts students This 9 chapter textbook offers modern applications of mathematics in the liberal arts as well as aesthetic features of this rich facet of history and ongoing advancement of human society With a central theme around the use of the concept of functions and the inclusion of unique topics and chapters Exploring Mathematics enables students to explore the next level of mathematics It attempts to answer the questions How does mathematics help us to better our society and understand the world around us and What are some of the unifying ideas of mathematics The central theme helps to impress upon the student the feeling that mathematics is more than a disconnected potpourri of rules and tricks Although it would be inappropriate to force a functional connection in every single section the theme is used whenever possible to provide conceptual bridges between chapters Developing the concept of a function augments the presentation of many topics in every chapter The Text s Objectives The author chose the topics based on meeting the specific NCTM curriculum standards to

- 1 Strengthen estimation and computational skills
- 2 Utilize algebraic concepts
- 3 Emphasize problem solving and reasoning
- 4 Emphasize pattern and relationship recognition
- 5 Highlight importance of units in measurement
- 6 Highlight importance of the notion of a mathematical function
- 7 Display mathematical connections to other disciplines
