the nature of professional knowledge and philosophical and moral dimensions of teachers thinking *Intelligent Systems and Applications* Yaxin Bi, Rahul Bhatia, Supriya Kapoor, 2019-08-23 The book presents a remarkable collection of chapters covering a wide range of topics in the areas of intelligent systems and artificial intelligence and their real world applications. It gathers the proceedings of the Intelligent Systems Conference 2019 which attracted a total of 546 submissions from pioneering researchers, scientists, industrial engineers and students from all around the world. These submissions underwent a double blind peer review process after which 190 were selected for inclusion in these proceedings. As intelligent systems continue to replace and sometimes outperform human intelligence in decision making processes, they have made it possible to tackle a host of problems more effectively. This branching out of computational intelligence in several directions and use of intelligent systems in everyday applications have created the need for an international conference as a venue for reporting on the latest innovations and trends. This book collects both theory and application based chapters on virtually all aspects of artificial intelligence, presenting state of the art intelligent methods and techniques for solving real world problems along with a vision for future research; it represents a unique and valuable asset.

Wagadu Kathryn Coffey, 2015-02-04 Traditionally transnational feminists have examined the fields of gender, sexuality and Lesbian, Gay, Bisexual, Transgender, Queer, LGBTQ studies by critically addressing issues of colonialism, white supremacy, globalization, capitalism and heterosexism. Like most fields within higher education, gender and sexuality studies, women's studies and LGBTQ studies are still dominated by white scholars. Moreover, these are predominately scholars from colonial western cultures. Many universities and activist groups are arguing for a global queer community and movement for rights, protection and freedoms for LGBTQ communities. From the academy to the streets, members of the LGBTQ community and their allies are challenging global heterosexism. This special issue of *Wagadu* is dedicated to an interdisciplinary, intersectional, multi-movement and multi-dimensional critique of heterosexism from a global social justice, queer perspective. Regardless of the topic or whether from a practical or theoretical perspective, all authors challenge the current paradigm of heteronormality that exists locally, nationally and/or globally. In this special issue of *Wagadu*, a Transnational Journal of Women's and Gender Studies.

Scissors, Paper, Stone Martha Langford, 2007-06-27 Finalist Raymond Klibansky Book Prize, Humanities and Social Sciences Federation of Canada, 2008. Making a connection between photography and memory is almost automatic. Should it be? In *Scissors, Paper, Stone*, Martha Langford explores the nature of memory and art. She challenges the conventional emphasis on the camera as a tool of perception by arguing that photographic works are products of the mind; picturing memory is first and foremost the expression of a mental process.

Langford organizes the book around the conceit of the child's game scissors paper stone using it to ground her discussion of the tensions between remembering and forgetting the intersection of memory and imagination and the relationship between memory and history Scissors Paper Stone explores the great variety of photographic art produced by Canadian artists as expressions of memory Their work including images by Carl Beam Carole Cond and Karl Beveridge Donigan Cumming Stan Denniston Robert Houle Robert Minden Michael Snow Diana Thorneycroft Jeff Wall and Jin me Yoon is presented as part of a rich interdisciplinary study of contemporary photography and how it has shaped modern memory

Handbook of Classroom Management Carolyn M. Evertson, Carol S. Weinstein, 2013-10-31

Classroom management is a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years Management problems continue to be a major cause of teacher burnout and job dissatisfaction Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with this critical field The Handbook of Classroom Management has four primary goals 1 to clarify the term classroom management 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers managerial tasks 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry and 4 to promote a vigorous agenda for future research in this area To this end 47 chapters have been organized into 10 sections each chapter written by a recognized expert in that area Cutting across the sections and chapters are the following themes First positive teacher student relationships are seen as the very core of effective classroom management Second classroom management is viewed as a social and moral curriculum Third external reward and punishment strategies are not seen as optimal for promoting academic and social emotional growth and self regulated behavior Fourth to create orderly productive environments teachers must take into account student characteristics such as age developmental level race ethnicity cultural background

socioeconomic status and ableness Like other research handbooks the Handbook of Classroom Management provides an indispensable reference volume for scholars teacher educators in service practitioners and the academic libraries serving these audiences It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management
