Casebook in Abnormal Psychology Timothy A. Brown,David H. Barlow,2001 Using cases taken from the authors case files or from case files of other working clinicians this casebook portrays the rich and arresting nature of disorders as they are displayed in real people Cases illustrate every major DSM IV category and are followed by a therapy outcome section which gives the rest of the story of what happened to these clients The authors draw on an extremely current and thorough database look at the multiple causes of disorders and incorporate developmental and cultural issues in each case Two complex cases are included without a diagnosis to give students an opportunity to come up with diagnoses on their own Personality Theories Workbook Donna Musialowski Ashcraft,2003 This unique workbook was written for the undergraduate Personality course where professors are looking for activities to help students learn and apply personality theories to real life examples The workbook is geared toward personality courses that are theories based as opposed to research based Because the cases explored are those based on normal behavior as opposed to abnormal behavior this workbook is especially useful While most personality texts present the major concepts of personality theories they don't help students apply the theories they have learned or to use the theories to understand other examples on their own This workbook will help students do just that and is the perfect complement to any Personality text
