

Signal Transduction Pathways

What happens inside of a cell when a signal has been received?

Why?

When cells release signal molecules (ligands) to send a message, and the message is received, a whole host of events take place inside the cell. The ultimate goal is a response—a gene is turned on, a protein is manufactured, an enzyme is activated, the cell divides or dies, etc. There are many responses that could occur, but the pathways to those responses are very similar.

Model 1 – Basic Signal Transduction Pathway

1. According to Model 1, does the signal transduction pathway occur inside or outside of a cell?

outside

2. Compare the shape of the ligand in Model 1 to the shape of the receptor protein.

They match / are made for each other

3. The four steps in the signal transduction pathway are listed below. Label the diagram above with the Roman numerals to indicate where on the diagram each step is taking place.

- I. Signaling
- II. Reception
- III. Transduction
- IV. Response

Pogil Answer Key Ap Biology Immunity

LP Steffe

Pogil Answer Key Ap Biology Immunity:

Right here, we have countless books **Pogil Answer Key Ap Biology Immunity** and collections to check out. We additionally give variant types and then type of the books to browse. The standard book, fiction, history, novel, scientific research, as capably as various new sorts of books are readily affable here.

As this Pogil Answer Key Ap Biology Immunity, it ends up brute one of the favored book Pogil Answer Key Ap Biology Immunity collections that we have. This is why you remain in the best website to see the unbelievable book to have.
