

Neuron Structure

What are the essential structures that make up a neuron?

Why?

Cells are specialized for different functions in multicellular organisms. In animals, one unique kind of cell helps organisms survive by collecting information and sending messages throughout the body. The shapes and features of neurons, which are the primary cells in the nervous system, enable animals to experience all of the five senses; find food, mates, and shelter; and to survive in their diverse environments.

Model 1 – Parts of a Neuron

1. Model 1 is an illustration of two neurons. Label one of the neurons in the diagram with the following structures:

Cell body or soma

Axon

Cell nucleus

Synapse

Dendrites

See Model 1.

2. Which structure(s) on the neuron in Model 1 would receive a signal from either a sensory cell (taste bud, touch receptor, retinal cell) or from another neuron?

The dendrites receive the signal from other cells.

3. Draw an arrow through the two cells in Model 1 to show the path of a nerve impulse if a message was being sent through the two neurons.

See dotted line in Model 1.

Johnston,Betty I. Roots,2013-10-22 Nerve Membranes A Study of the Biological and Chemical Aspects of Neuron Glia Relationships presents the various aspects of neuronal and glial structure and function This book provides an interdisciplinary approach to the analysis of neuron glia relationships and of membranes in the nervous system Comprised of seven chapters this book begins with an overview of the function of the biological membranes to improve retard and regulate the rate of cellular reactions This text then determines the differences in the organization of the cells in the nervous system in the vertebrates and the invertebrates Other chapters examine the role of certain intermolecular forces and of water in the organization of lipid protein and lipid lipid associations This book reviews as well the theories of biological membrane structure and considers how these contribute towards understanding the methods by which membranes perform their role This book is a valuable resource for neuroscientists neurochemists and researchers **Structure and Connections of Neurons** Santiago Ramón y Cajal,Cyril Brian Courville,Leon Lampell,1952
