## **Real Estate Dynamics 17th Edition:**

**Real Estate** Peter Dent, Michael Patrick, Xu Ye, 2012-10-02 Traditional studies of the property market have tended to focus solely on commercial and legal issues but the growing importance of the issue of sustainability means that a different approach is needed. This new textbook provides an overview of property within a market context, examining the complex nature of property rights and issues related to both investors and occupiers. At the same time, it assesses property from the perspective of financial, social, and environmental sustainability. Topics covered range from the characteristics of property and depreciation to ownership and development, through to investments and sustainability reporting. The book concludes with key skills in sustainable knowledge needed by those working in the real estate industry. Written by an author team of experienced property professionals, this essential introductory textbook is well suited for property planning and architecture students on undergraduate, graduate, and conversion courses, as well as those on CPD and training programmes in related areas.

**Concepts of Value in European Material Culture, 1500-1900** Bert De Munck, Dries Lyna, 2016-03-09 In contemporary society, it would seem self-evident that people allow the market to determine the values of products and services. For everything, from a loaf of bread to a work of art to a simple haircut, value is expressed in monetary terms and seen as determined primarily by the objective interplay between supply and demand. Yet this price mechanism is itself embedded in conventions and frames of reference which differed according to time, place, and product type. Moreover, the dominance of the conventions of utility maximising and calculative homo economicus is a relatively new phenomenon, and one which directly correlates to the steady advent of capitalism in early modern Europe. This volume brings together scholars with expertise in a variety of related fields, including economic history, the history of consumption and material culture, art history, and the history of collecting, to explore changing concepts of value from the early modern period to the nineteenth century and present a new view on the advent of modern economic practices. Jointly, they fundamentally challenge traditional historical narratives about the rise of our contemporary market economy and consumer society. World Heritage Patinas
