The Material of World History Tina Mai Chen,David S. Churchill,2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes

Spanish Women in the Golden Age Alain Saint-Saens, Magdalen Sánchez, 1996-02-13 The history of women in early modern Spain is a largely untapped field This book opens the field substantially by examining the position of women in religious political literary and economic life Drawing on both historical and literary approaches the contributors challenge the portrait of Spanish women as passive and marginalized showing that despite forces working to exclude them women in Golden Age Spain influenced religious life and politics and made vital contributions to economic and cultural life The contributors seek to incorporate the study of Spanish women into the current work on literary criticism and on the intersection of private and public spheres The authors integrate women into subfields of Spanish history and literature such as Inquisition studies the Spanish monarchy Spain's economic and political decline and Golden Age drama The essays demonstrate the necessity and value of incorporating women into the study of Golden Age Spain Bibliographie Internationale de Sociologie 1987 British Library of Political and Economic Science, 1991 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge on the social sciences *Adapting Translation for the Stage* Geraldine Brodie, Emma Cole, 2017-07-06 Translating for performance is a difficult and hotly contested activity *Adapting Translation for the Stage*

Schools and Informal Learning in a Knowledge-Based World Javier Calvo de Mora, Kerry J. Kennedy, 2019-09-19 This book has two purposes To open up the debate on the role of informal education in schooling systems and to suggest the kind of school organizational environment that can best facilitate the recognition of informal learning Successive chapters explore what is often seen as a duality between informal and formal learning This duality is particularly so because education systems expend so much time and effort in certifying formal knowledge often expressed in school subjects reflecting academic disciplines Recognizing the contribution informal learning can make to young people's understanding and development does not negate the importance of valued social knowledge That complements it Students come to school with knowledge learnt from their families peers the community and both traditional and social media They should not have to unlearn this in order to enter the world of formal learning Rather students different learning worlds should be integrated so that each informs the other In a knowledge based society all learning needs to be valued Some contributors to this book reflect on how new educational systems could be created in a move away from top down authoritarian and bureaucratic management Such open systems are seen to be more welcoming in acknowledging the importance of informal learning Others provide practical examples of how informal learning is currently recognized Some attention is also paid to the evaluation of informal learning A key objective of the work presented here is to stimulate debate about the role of informal learning in knowledge based societies and to stimulate thinking about the kind of reforms needed to create more open and more democratic school learning environments
