was of a pioneer nature founded on scant data Peirce also made major contributions in fields as diverse as mathematical logic and psychology C I Lewis has remarked that the head and font of mathematical logic are found in the calculus of propositional functions as developed by Peirce and Schroeder Peirce subsequently invented almost from whole cloth semiotics the science of the meaning of signs Ogden and Richards the British critics say that by far the most elaborate and determined attempt to give an account of signs and their meanings is that of the American logician C S Peirce from whom William James took the idea and the term Pragmatism and whose Algebra of Dyadic Relations was developed by Schroeder
