Ocean Sailing Paul Heiney, 2019-09-05 This is the reassuring voice of the ocean sailing community Your big adventure starts here For many sailors an ocean passage is the big dream But many will worry that they don't have the right experience that their boat isn't strong enough or that it will be prohibitively expensive and difficult Ocean Sailing will prepare you for an ocean passage by painting a picture of what ocean sailing is really like through the experiences of others who have gone before Topics covered range from safety to boat kit and preparations budgeting to staying in touch with home equipment breakdowns to health and weather Members of three great cruising clubs the Royal Cruising Club Ocean Cruising Club and the Cruising Club of America share their vast wealth of experience and by focusing on the practicalities of ocean sailing allay the anxieties and doubts of prospective ocean cruisers to ensure a deeply satisfying ocean voyage **Bookseller & Stationer and Office Equipment Journal** ,1923 **East Sails West** Stephen Davies, 2013-12-01 In December 1846 the Keying a Chinese junk purchased by British investors set sail from Hong Kong for London Named after the Chinese Imperial Commissioner who had signed away Hong Kong to the British manned by a Chinese and European crew and carrying a travelling exhibition of Chinese items the Keying had a troubled voyage After quarrels on the way and a diversion to New York culminating in a legal dispute over arrears of wages for Chinese members of the crew it finally reached London in 1848 where it went on exhibition on the River Thames until 1853 It was then auctioned off towed to Liverpool and finally broken up In this account of the ship the crew and the voyage Stephen Davies tells a story of missed opportunities with an erratic course overambitious aims and achievements born of lucky breaks a microcosm in fact of early Hong Kong and of the relations between China and the West **The Rudder** Thomas Fleming Day, 1911 **Science and Civilisation in China,**

Part 2, Mechanical Engineering Joseph Needham, 1965-01-02 As Dr Needham's immense undertaking gathers momentum it has been found necessary to subdivide volumes into parts each to be bound and published separately The first part of Volume 4 already published deals with the physical sciences the second with the diverse applications of physics in the many branches of mechanical engineering and the third will deal with civil and hydraulic engineering and nautical technology With this part of Volume 4 then we come to the application by the Chinese of physical principles in the control of forces and in the use of power we cross the frontier separating tools from the machine We have already noticed that the ancient Chinese concept of *chhi* somewhat similar to the *pneuma* of the Greeks asserted itself prominently in acoustics but we discover here that the Chinese tendency to think pneumatically was also responsible for a whole range of brilliant technological achievements for example the double acting piston bellows the rotary winnowing fan and the water powered metallurgical blowing machine ancestor of the steam engine as well as for some extraordinary insights and predictions in aeronautics
