Risk General Stanley McChrystal, Anna Butrico, 2021-10-05 From the bestselling author of *Team of Teams* and *My Share of the Task* an entirely new way to understand risk and master the unknown Retired four star general Stan McChrystal has lived a life associated with the deadly risks of combat From his first day at West Point to his years in Afghanistan to his efforts helping business leaders navigate a global pandemic McChrystal has seen how individuals and organizations fail to mitigate risk Why Because they focus on the probability of something happening instead of the interface by which it can be managed In *Risk* General McChrystal offers a battle tested system for detecting and responding to risk Instead of defining risk as a force to predict McChrystal and coauthor Anna Butrico show that there are in fact ten dimensions of control we can adjust at any given time Drawing on examples ranging from military history to the business world and offering practical exercises to improve preparedness McChrystal illustrates how these ten factors are always in effect and how by considering them individuals and organizations can exert mastery over every conceivable sort of risk that they might face We may not be able to see the future but with McChrystal's hard won guidance we can improve our resistance and build a strong defense against what we know and what we don't

**Ubiquitous Mobile Information and Collaboration Systems** Luciano Baresi, Schahram Dustdar, Harald Gall, Maristella Matera, 2005-03-01 Over recent years most business processes have changed in various dimensions e g exibility interconnectivity coordination style autonomy due to market conditions organizational models and usage scenarios of information systems Frequently inf mation is relocated within a geographically distributed system according to rules that are only seldom defined as a well coded business process This creates the need for a software infrastructure that enables ubiquitous mobile and collaboration systems UMICS The anywhere anytime any means paradigm is becoming the major challenge in

conceiving designing and releasing next generation information systems New technologies like wi networks and 3rd generation mobile phones are offering the infrastructure to conceive of information systems as ubiquitous information systems that is systems that are accessible from anywhere at any time and with any device Ubiquity is not yet another buzzword pushed by emerging technologies but is mainly a means to support new business models and encourage new ways of working This new wave of UMICS will exploit the knowledge developed and deployed for conventional information systems but will also need new concepts models methodologies and supporting technologies to fully exploit the potentials of the enabling infrastructure and to be ready for the challenge Moreover people need to move across organizational boundaries and collaborate with others within an organization as well as between organizations The ability to query the company's distributed knowledge base and to cooperate with co-workers is still a requirement but mobility brings new access scenarios and higher complexity
