### No power / won't get into programming mode

If you have a car with a standard interface, make sure the PSWIP5 is connected to switched vehicle, non-switched vehicle, and ground (chassis or pin).

### The PSWIP5 won't control the vehicle immediately without pressing any buttons on the steering wheel

During programming, press the buttons on the steering wheel twice with the PSWIP5 turn off. After using the button for only one cycle, the PSWIP5 will start with a regular scan when no buttons are pressed.

### The PSWIP5 won't control the radio when on the steering wheel is turned (mostly late 80's early 90's Honda/Acura)

Program button 00004 (2) for version 4.1.

### When you're program a new button the previous button does not work

When programming, all buttons during programming. If you try to program another button, all previous buttons will be stored. You will have to relearn all previous buttons again.
