September, 1855. [With plates.]* Crimean Army Fund (England), 1855 *The New Information Industry* Richard Klingler, 2010-12-01 Rapid developments in technology are reshaping how citizens receive and use information electronically At the same time government regulation limits the services that may be offered by the industries that transmit information and will determine how interactive and other advanced video services are able to develop In this book Richard Klingler traces the evolution of regulatory regimes that constrain the broadcasting telephone and cable television industries as well as emerging information services He also examines new information delivery systems and the integration of electronic carriage with provision of content and information services including services that resemble printed products Klingler describes two basic challenges to current regulation of these industries First established regulatory regimes often harm competition and the development of services in industries that are increasingly interrelated and rapidly changing He outlines how recent developments contradict basic assumptions underlying the structure of current regulation and how regulation might better respond to those developments Second the Constitution limits regulation of these industries as they increasingly engage in activities protected by the First Amendment Klingler shows how the First Amendment as recently elaborated applies to electronic transmission of information and likely precludes certain forms of regulation including established regulation of the content of communications The book also examines how regulation designed to limit market power in these industries can be reconciled with the First Amendment **All about Cable and Broadband** James C.
