Revolutions Theoretical Comparative And Historical Studies 2nd Edition:

Revolutions Jack A. Goldstone, Robert King Merton, 1986 *Revolutions* Stephen K. Sanderson, 2015-12-03 This expanded updated edition of *Revolutions* offers a new chapter on terrorism and on social movements including jihadism. *Revolutions* and state breakdowns are the primary focus as Sanderson presents prominent theories and describes the process of revolutions. The book covers famous revolutions from history: France, Russia, China, and several social and political revolutions in the Third World: Cuba, Nicaragua, Iran, and the Philippines. Given the frequency of revolutionary movements, a key question addressed by the book is: Why are actual revolutions so rare? Sanderson also assesses the state breakdowns in Eastern Europe and the Soviet Union after 1989, the typical outcomes of revolutions, and the future of revolutions. An appendix presents biographical and autobiographical sketches of several of the most prominent scholars of revolutions.

Revolutions and Revolutionary Movements James DeFronzo, 2018-05-04 With crucial insights and indispensable information concerning modern day political upheavals, *Revolutions and Revolutionary Movements* provides a representative cross section of the most significant revolutions of the twentieth and twenty-first centuries. This Fifth Edition is revised and updated with a new chapter on the Arab Revolution from its beginning in December 2010 to the present. In this widely used text, students can trace the historical development of eleven revolutions using a five-factor analytical framework. Author James DeFronzo clearly explains all relevant concepts and events, the roles of key leaders, and the interrelation of each revolutionary movement with international economic and political developments and conflicts, including World Wars I and II, the Cold War, and the War on Terror. Student resources include multiple orienting maps, summary and analysis sections, suggested readings, chronologies, and documentary resources. *Revolutions* Paul Caringella, Glenn Hughes, 2013-02-21 *Revolutions Finished and Unfinished: From Primal to Final* is an important philosophical contribution to the study of revolution. It not only makes new contributions to the study of particular revolutions but to developing a philosophy of revolution itself. Many of the contributors have been inspired by the philosophical approaches of Eric Voegelin or Eugen Rosenstock-Huussy, and the tension between these two social philosophies adds to the philosophical uniqueness and richness of the work. *Revolution and the Millennium* James F. Rinehart, 1997-10-30 An interdisciplinary cross-cultural cross-historical analysis of three 20th-century non-Western revolutionary societies: China, Mexico, and Iran, that were profoundly impinged upon by European and American imperialism. The study explores the role of apocalyptic beliefs in radical movements bent on sociopolitical transformation. It concludes that millennial expectations performed important and similar preparatory leadership and therapeutic functions in each case. Millenarian movements are powerful and emotional social movements that expect an immediate collective total, this worldly supernatural salvation and transformation of society. They anticipate the complete destruction of the existing sociopolitical and economic order, which they assert will be followed by a new and perfect society. This study provides an interdisciplinary cross-cultural cross-historical analysis of three 20th-century

non Western revolutionary societies that were profoundly impinged upon by European and American imperialism It seeks to explore the functional role of millenarianism in these three revolutions In all three cases millenarianism prepared the way for revolutionary transformation It acted as a catalyst for action among that group of the most ardent revolutionists who were willing to pay any price to achieve what they were convinced was the inevitable goal of a utopian society Millenarianism created the potential for charismatic leadership to emerge It functioned as a doctrinal platform that awaited the opportunity to elevate a prophetic revolutionary leader to take control Finally millenarianism performed a therapeutic identity and cathartic function by providing the doctrinal foundation and an effective organization for a social healing process to take place A challenge to conventional arguments on the origins and outcomes of revolutions this study will be of great interest to scholars and researchers in comparative politics sociology and religion **The Psychopolitics of Liberation L.**

Alschuler,2016-01-19 Explaining changes in the political consciousness of the oppressed using the ideas of Paulo Freire Albert Memmi and Jungian psychology this original book explores how psychological bonds of oppression are broken and offers a psychopolitical theory for the analysis of the autobiographies of four Native people in Guatemala and Canada

Strikes, Social Conflict, and the First World War Leopold H. Haimson, Giulio Sapelli, 1992 *Handbook of Revolutions in the 21st Century* Jack A. Goldstone, Leonid Grinin, Andrey Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded

systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra

The Twilight of World Trotskyism John Kelly, 2022-10-28 The Twilight of World Trotskyism analyzes the reasons behind the historic failure of the Trotskyist movement around the world The book begins this assessment by briefly recapitulating the origins of Trotskyism as a political current within the communist movement and elaborating its major elements before describing the historical development of Trotskyism in the four countries where it has sunk the deepest roots and which house the clear majority of the world's Fourth Internationals Argentina Britain France and the USA It then proceeds to map the current state of the global Trotskyist movement Whatever their current size and status Trotskyist organizations aspire to become mass political parties and lead revolutionary seizures of power It is therefore appropriate to examine them through the metrics applied to mainstream parties namely organization membership and political influence The author looks at the dynamics of the Trotskyist movement focusing in particular on the supposedly harmful effects of the communist movement before then turning to examine the role of Trotskyist organizations in the many revolutionary situations that have appeared since the 1920s and in the various cycles of protest that have occurred in the latter half of the 20th century and the early years of the 21st century The final section examines the two success stories frequently cited in Trotskyist literature namely the cases of Bolivia and Sri Lanka The book concludes by setting out and examining a wide variety of explanations for the chronic and sustained weaknesses of the Trotskyist movement including its flawed appraisals of contemporary politics and economics ultra radical programmes and policies failures in understanding the dynamics of protest and the baleful legacy of Soviet communism It is argued that these weaknesses are rooted in Trotskyist doctrine and are therefore integral not peripheral features of world Trotskyism This volume will be essential reading for activists and scholars interested in the transnational history and politics of the radical left
