F-82 Twin Mustang Pilot's Flight Operating Instructions United States Air Force, USAF, 2008-09-01 The F 82 Twin Mustang was conceived during WWII as a long range fighter escort Like the P 51 it was designed by North American s brilliant engineer Edgar Schmued The F 82 utilized two extended P 51 fuselages mounted to a newly designed center wing and tail The plane incorporated new propeller assemblies and a unique four wheel landing gear In short while the plane would be cosmetically similar to the Mustang in reality it was an entirely new beast The F 82 wasn t ready before WWII ended but the program escaped cancellation and planes entered operational service in 1948 The F 82 became the last piston powered fighter ordered by the USAF It flew as an escort for SAC B 29s and with distinction as a night fighter in Korea It was retired in 1953 Originally printed by the USAF and North American this pilot s handbook provides a glimpse inside the cockpit of this warbird Originally classified Restricted the manual was de classified and is here reprinted in book form
