Blair, Jeffrey L. Harrison, 2010-09-06 Most readers are familiar with the concept of a monopoly A monopolist is the only seller of a good or service for which there are not good substitutes Economists and policy makers are concerned about monopolies because they lead to higher prices and lower output The topic of this book is monopsony the economic condition in which there is one buyer of a good or service It is a common misunderstanding that if monopolists raise prices then monopsonists must lower them It is true that a monopsonist may force sellers to sell to them at lower prices but this does not mean consumers are better off as a result This book explains why monopsonists can be harmful and the way law has developed to respond to these harms Sports Law Practice Martin J.
