These self-reported behaviors were measured through four self-administered scales to assess perceived drinking habits. Because binge drinking was the focus of the study, the first three self-rated measures focused on the ability to abstain from drinking. The first scale, abstaining from drinking, was a five-item scale that asked the respondent to indicate how often they abstained from drinking in the past 12 months. The second scale, abstaining from drinking at least once a week, was a five-item scale that asked the respondent to indicate how often they abstained from drinking at least once a week in the past 12 months. The third scale, abstaining from drinking at least once a month, was a five-item scale that asked the respondent to indicate how often they abstained from drinking at least once a month in the past 12 months. The fourth scale, abstaining from drinking at least once a year, was a five-item scale that asked the respondent to indicate how often they abstained from drinking at least once a year in the past 12 months.
