exchange of medical theories practices and materials in the premodern period This volume of *Osiris* turns the analytical lens of translation onto medical knowledge and practices across the premodern world Understandings of the human body and of diseases and their cures were influenced by a range of religious cultural environmental and intellectual factors As a result complex systems of translation emerged as people crossed linguistic and territorial boundaries to share not only theories and concepts but also materials such as drugs amulets and surgical tools The studies here reveal how instances of translation helped to shape and in some cases reimagine these ideas and objects to fit within local frameworks of medical belief

Translating Medicine across Premodern Worlds features case studies located in geographically and temporally diverse contexts including ninth century Baghdad sixteenth century Seville seventeenth century Cartagena and nineteenth century Bengal Throughout the contributors explore common themes and divergent experiences associated with a variety of historical endeavors to translate knowledge about health and the body across languages practices and media By deconstructing traditional narratives and de emphasizing well worn dichotomies this volume ultimately offers a fresh and innovative approach to histories of knowledge
