Abstract

This project involves the developmental milestones that one takes throughout life. The overall goal of this paper is to give the reader the understanding that the writer has knowledge about the theories and concept of Human Growth and Development. It will incorporate more about the development and growth of the writer. Information from the writer's mother about her journey of her pregnancy and if she had any problems with her pregnancy. There will be an explanation from the mother about developmental milestones reached. There are a few early events that took place during the writer's development it will be showcased in the paper. Finally the conclusion of the paper will focus on the lifestyle behaviors that might influence the writer's current aging process and if there are any issues exactly how she would address it.

Developmental Milestones

Developmental milestones are important journeys that everyone takes throughout out life. Once a mother first finds out that she is pregnant the child in which she is carrying begins to embark on their journey of life. Everyone does not reach their milestones on target or even at all. Each person is at a different stage in their life, therefore their milestones and journey will vary, from one to the other. My particular journey and development has followed the path of Psychologist Erik Erikson's psychosocial stages of human development. I am currently between stages five and six. Stage five is identity vs. identity confusion and stage six is intimacy vs. isolation. Although I am a young adult I am still developing and hitting milestones on my journey of life.

Mother's Journey

While being pregnant with me my mother speaks that she had no problem during her entire nine months of pregnancy. She did not have any problems until delivery. She was in labor for two days. Her water was broken and at that time I stopped moving down. She did not dilate anymore. Once dilation stopped it was found that the umbilical was wrapped around my neck. Although the cord caused stress and my heart rate to drop while in labor, it did not cause any other known complications once I was born. She was in labor for two days.

Milestones

Developmental milestones are important in a child's life. Developmental milestones have a wide range of different functional skills that a child is able to do as they hit certain ages. "Infancy and childhood are dynamic periods of growth and change" (Gerber, Wilks, & Erdie-Larena, 2010). At each age a child is supposed to reach milestones in their life that would consider them as developing normal. If the child does not reach that particular milestone for their age then they are considered to have a developmental delay. Developmental milestones are associated with a child's gross motor, cognitive, social, language, and fine motor skills. When a child develops their gross motor skills they are able to walk, stand, and sit. They learn how to use their major...

The Psychology of Control and Aging Margret M. Baltes, Paul B. Baltes, 2014-08-01 Originally published in 1986 the central topic of this book is the analysis and application of control related beliefs and behaviours for theory and practice in the psychology of aging The volume was written for two specific interrelated purposes aimed at cross fertilization between the psychology of control and the field of gerontology The first purpose was to summarise available research and theory on the psychology of control for researchers and professionals interested in gerontology at the time The second was to enrich the field of the psychology of control

Human Behavior and Environment Irwin Altman, Joachim F. Wohlwill, 2012-12-06 The papers comprising this second volume of Human Behavior and the Environment represent as do their predecessors a cross section of current work in the broad area of problems dealing with interrelationships between the physical environment and human behavior at both the individual and the aggregate levels Considering the two volumes as a unit we have included papers covering a broad spectrum of problems ranging from the theoretical to the applied and from the disciplinary based to the interdisciplinary and professional Approxi

mately half of the papers are written by psychologists with the remainder coming in part from such other disciplines as sociology geography and from such diverse applied and professional fields as natural recreation landscape architecture urban planning and operations research The volumes thus provide an overview of work on current topical problems Yet as the field is developing specialization is inevitably increasing apace and the editors as well as the publisher have become convinced of the desirability for future volumes in this series to be organized along topical lines with successive volumes devoted to different aspects of this rather sprawling field Thus Volume 3 currently in the planning stage will be devoted exclusively to the interaction of children with the physical environment considered from diverse viewpoints again including authors from diverse fields of specialization

The Oxford Handbook of Reciprocal Adult Development and Learning

Carol Hoare, 2011-09-06 One of the Best Books of 2011 from the Center for Optimal Adult Development The fields of adult development and the study of learning have traditionally been considered separate with development falling under psychology and learning under education However recent ideas research and practices that have emerged in these fields of study effectively emphasize the inherent reciprocal relationship that exists between them advances in development frequently lead to learning and conversely learning almost necessarily fuels development In this second edition of The Oxford Handbook of Reciprocal Adult Learning and Development the synchronicity between development and learning is explored further as expert authors advance the latest theories to provide a rich foundation for this new area of study and practice for this interrelated field of study At the border of two disciplines this handbook focuses on the capacities of intelligence meta cognition insight self efficacy spirituality interpersonal competence wisdom and other key adult attributes as they relate to positive changes and personal growth in adults Contexts for development and learning e g the work role and environment are also addressed and mixed in throughout the volume are emanating implications for research practice and policy What emerges is a thoughtful handbook for all who promote optimal aging and is a must read for academics psychologists and practitioners in adult development
