Computer-based video communication

Usability made easier

Polycom CMA Desktop – for Windows® is a robust and full-featured video communication software client that is deployed and managed by the Polycom CMA Server, a standards-based management application which enables large-scale directory services, centralised provisioning and management for thousands of video endpoints, including high definition telepresence, legacy video conferencing systems and other video infrastructure components.

The Polycom CMA Desktop application delivers high definition video and voice communication and standards-based content sharing with other desktop clients through the largest immersive telepresence rooms. Easy to learn and highly intuitive, the CMA Desktop allows users to simply point and click to call and collaborate with colleagues by video from anywhere, at any time. Integrated presence-awareness allows users to verify contact availability and status, and seamless Microsoft® LDAP directory integration both simplifies management and ensures contact list accuracy.

Polycom CMA Desktop clients are managed and monitored within the same video ecosystem as telepresence and traditional video conferencing systems, providing a powerful solution that spans all video client environments. Administrators easily configure the clients for account access, bandwidth allocation, directory services and other functions right from the management console via XML. CMA Desktop clients are included as a component of the CMA Server, with licensing based on the industry-recognised CAL (Client Access Licence) deployment model.
