Redefining Global Strategy Questions:

Redefining Global Strategy, with a New Preface Pankaj Ghemawat, 2018-04-10 New Tools for Succeeding Globally Why do so many global strategies fail despite companies powerful brands and other border crossing advantages Because a one size fits all strategy no longer stands a chance When firms believe in the illusions of a flat world and the death of distance they charge across borders as if the globe were one seamless marketplace But cross border differences are larger than we assume Most economic activity including trade real and financial investment tourism and communication happens locally not internationally In this semiglobalized approach companies can cross borders more profitably by basing their strategies on the geopolitical differences that matter they must identify the barriers their strategies will have to overcome and they must build bridges to cross those barriers Based on rigorous research Pankaj Ghemawat shows how to create successful strategies and provides practical management tools so you can Assess the cultural administrative geographic and economic differences between regions at the industry level and decide which ones require attention Track the implications of the specific border crossing actions that will impact your company s ability to create value the most Generate superior performance through strategies that are optimized for the three A s adaptation adjusting to differences aggregation overcoming differences and arbitrage exploiting differences Using in depth examples Ghemawat reveals how companies such as Cemex Toyota Procter Gamble Tata Consultancy Services IBM and GE Healthcare are adroitly managing cross border differences He also shares examples of other well known companies that have failed at this challenge Crucial for any business competing across borders Redefining Global Strategy will help you make the most of our semiglobalized world

Globalization in Question Paul Hirst, Grahame Thompson, Simon Bromley, 2015-01-28 Globalization is one of the key concepts of our time It is used by both the right and the left as the cornerstone of their analysis of the international economy and polity In both political and academic discussions the assumption is commonly made that the process of economic globalization is well under way and that this represents a qualitatively new stage in the development of international capitalism But is there in fact such a thing as a genuinely global economy Globalization in Question investigates this notion providing a very different account of the international economy and stressing the possibilities for its continued and extended governance The new edition of this best selling text has been thoroughly revised and updated to take into account new issues which have become salient in the period since the first and second editions were published Several new chapters have been added and others combined or re written to assess the growing supra national regionalization of the international economy the emergence of India and China as new super powers and the possibilities for the continued governance of the global system A new author has been added to strengthen the analytical embrace of the book given the untimely death of Paul Hirst in 2003 Globalization in Question s third edition is a continuing intervention into current discussions about the nature and prospects of globalization The book has far reaching implications which will be of interest to students and academics in a

number of disciplines including politics sociology economics and geography as well as to journalists and policy makers

Rethinking International Strategy in Times of rising Uncertainty. The Internationalization of Tesla Inc. Moritz Henninger, 2021-02-17 Bachelor Thesis from the year 2020 in the subject Business economics Business Management Corporate Governance grade 1 3 University of Stuttgart Institute for International and Strategic Management language English abstract This paper hopes to answer how increasing uncertainty is impacting International Management and how new and innovative companies like Tesla Inc conduct international expansion Economic activities in the 21st century are characterized by dynamic global competition the increasing interdependence and internationalization of economic relations and the resulting merging of world markets With the continuous expansion of world trade and investment with factors of production being highly mobile and with the sources of innovation becoming increasingly global an increasingly larger share of the global economy is reasonably accurately characterized as open it est as being exposed to the forces of global competition and to the international flows of capital technology and skilled labor Yet the belief in globalization and free trade seems to be in disarray since the shocks of Brexit and Trump in 2016 In various regions of the world a flare up of nationalism protectionism and trade barriers is creating a politically and economically volatile atmosphere While 2019 and 2020 brought new obstacles from customs tariffs to a global pandemic this has led to a shift in framework conditions rather than an end to international competition In addition a lot of companies across various business sectors are entangled in extensive and expensive investment or restructuring programs brought upon by the ever increasing pace of technological sociological and legal developments Still there is uncertainty if these investments will one day pay off or turn out the be a charge in the wrong direction Between 1970 and 2018 FDI grew from 14 2 billion to 1 43 trillion US dollars an increase of over 900 percent Based on this rapid development participation in international competition has become a matter of course if not a necessity for many companies

and their attention is focused on efficient conduct and value adding administering of international activities This begs the question how internationally active companies with a global and decentralized value chain can fight rising uncertainty and react to constantly changing environments How can these companies not only hold on to existing business but expand their dominance in the market against the backdrop of uncertainty Are established strategy models such as Ghemawat's AAA model still applicable today do they need to be revised or is there even a need for completely new approaches
