How Does Light Interact with Objects?

At the beginning of this unit, when you were brainstorming what you knew about light, you may have included some of the ways that light interacts with objects. In Grade 4 you learned that objects can be classified as transparent (let light pass through) or opaque (don't let light pass through). In this section you'll examine in more detail what happens when light interacts with opaque objects that are reflective in nature, and also with transparent objects.

Question: Reflection

* Text p. 222 + 223

There are many instances where a reflection can be observed in everyday life, for example, your face in a bathroom mirror. What are other examples of where you might encounter your reflection over the course of a day? Give two or three examples.

car mirrors, school bus mirrors, cosmetic mirrors

In order to explain how light reflects, scientists have created the Law of Reflection. You'll explore this law in the following pages.
