Frontiers of Knowledge: Scientific and Spiritual Sources for a New Era Douglas Kinney,2014-06-06 Frontiers of

Knowledge is the story of unfolding developments that are revolutionizing our understanding of ourselves and our place in the universe. We are birthing a new era in which our ideas about the nature and source of reality are swiftly changing. Insights from quantum physics suggest that the basis of our physical world is actually mental conscious thoughts. Other discoveries are causing us to redefine our concepts of mind and the elusive thing we call consciousness. All strongly hint that spirituality is the underlying source of everything. Frontier scientists and scientifically trained researchers are providing us with a rich and expanding base of knowledge through systematic investigations of startling phenomena that have been observed in quantum physics, cosmology, biology, psychology, disease, and healing, death, near death experiences, reincarnation experiences, and those occurring in spiritual hypnosis on the nature of the spiritual realm. New concepts of reality are especially needed to explain the incredibly finetuned characteristics and the mysterious nature of our physical universe. Ninety five percent of the universe's energy and mass are a mystery to scientists and for the moment we resort to naming them dark matter and dark energy. The last time a comparable knowledge revolution occurred was in the late sixteenth century when astronomers determined that the planets revolved around the sun, not the earth. Historians call it the Copernican Revolution because it led to modern Western science. From one perspective, the new era predicted in this book, a revolution in its own right, can be considered the completion of the quantum revolution by defining and explaining the role of consciousness in our universe. An underlying aspect of this new revolution is the sense that humanity is moving into a new era of rapidly expanding knowledge of the human spirit, our soul, aspect, and non-physical realities. Until now, this emerging knowledge has not been organized into a coherent and comprehensive structure. *Frontiers of Knowledge* provides the first outline of this new structure of reality. [EXPLORING REINCARNATION](#) Hans TenDam, 2012-12-31. *Exploring Reincarnation* examines the full range of explanations for past life recall. This definitive study includes case histories from around the world as well as intriguing theories about the relationship between body and soul, from general social beliefs about past lives to detailed questions about karma and past life regression therapy. An outstanding introduction to reincarnation from a historical, scientific, and philosophical point of view. *Exploring Reincarnation* is the now classic panorama on reincarnation ideas and experiences. **Soul Visioning** Susan Wisheart, 2008. *Discover Your Soul's Wisdom and Transform Your Life*. You have the power to create a life of passion and purpose by following the wisdom of your soul. Using breakthrough methods such as energy psychology, guided journeys, forgiveness practices, and past life and life between lives regression, Susan Wisheart shares practical step by step techniques to heal the unconscious beliefs that block your awareness of your true spiritual identity and life purpose. In this unique wellness book, *The Soul Visioning* journey connects you with your Higher Self to guide you into the ideal expression of your soul in your work, relationships, health, finances, and spirituality. Dramatic and inspiring case studies with long term follow up interviews reveal how people have transformed their lives using these powerful methods. Join a rigorous scholar and Buddhist monk on a brisk tour of rebirth from ancient doctrine to contemporary debates German Buddhist monk and university professor Bhikkhu Analayo had not given much attention to the topic of rebirth before some friends asked him to explore the treatment of the issue in early Buddhist texts This succinct volume presents his findings approaching the topic from four directions The first chapter examines the doctrine of rebirth as it is presented in the earliest Buddhist sources and the way it relates to core doctrinal principles The second chapter reviews debates about rebirth throughout Buddhist history and up to modern times noting the role of confirmation bias in evaluation of evidence Chapter 3 reviews the merits of current research on rebirth including near death experience past life regression and children who recall previous lives The chapter concludes with an examination of xenoglossy the ability to speak languages one has not learned previously and chapter 4 examines the particular case of Dhammaruwan a Sri Lankan boy who chants Pali texts that he does not appear to have learned in his present life *Rebirth in Early Buddhism and Current Research* brings together the many strands of the debate on rebirth in one place making it both comprehensive and compact It is not a polemic but an interrogation of the evidence and it leaves readers to come to their own conclusions
