Due to swift technological changes and the resultant digital revolution a wide range of new digital financial products and services have emerged in the financial markets as witnessed in the context of the fintech sector the economics of blockchain and NFT issuance This book takes an in depth look at the challenges faced by individuals who make investment decisions in a rapidly changing financial world and presents a concise and thorough overview of the multifaceted approach to investment and savings behavior It explores behavioral digital finance referencing the latest theories in economic psychology and financial markets and provides an analysis of the process of saving and investing in the context of our new digital reality where an understanding of human AI interaction and its benefits and threats is extremely important It combines an accessible overview of classical and new behavioral theories models of financial decision making as well as an analysis of the new trends in financial decision making Special attention is given to financial decision support systems and the role of financial advice services which are of growing importance due to their increasing complexity and difficulty The book combines theoretical considerations and wide reaching empirical analyses from a representative sample of international respondents It deals with the individual approach to human risk taking and human AI interaction and its benefits and threats The book explores how people react to algorithms what drives algorithm aversion and appreciation and how understanding of those mechanisms can be employed to improve financial advisory systems and also considers the impact of the Covid 19 pandemic on financial behavior Chapter 4 of this book is freely available as a downloadable Open Access PDF at [www.taylorfrancis.com](http://www.taylorfrancis.com) under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 International license Fundamental Analysis, Behavioral Finance and Technical Analysis on the Stock Market Timo

Schlichting, 2009-07-31 Diploma Thesis from the year 2008 in the subject Business economics Investment and Finance grade 2 0 University of Applied Sciences Essen language English abstract Historically considered fundamental and technical analyses have always competed often leading to advocates that ideologically judge either a fundamental analysis or technical analysis to be the one and only analyzing concept Behavioral finance is a relatively new scientific approach to explain psychological anomalies on the stock market but is also more and more often considered to be able to compete with both fundamental and technical analyses Still do these analysis concepts really compete in practice or could they actually supplement each other with their respective strengths Taking the turbulent stock market phases as well as these unanswered questions about fundamental analysis behavioral finance and the technical analysis into consideration this thesis ultimately pursues two general objectives Firstly fundamental analysis behavioral finance and technical analysis should be scientifically examined in terms of their premises analysis approaches empirical evidences as well as strengths and weaknesses Secondly it should be examined as to whether the fundamental analysis behavioral finance and technical analysis have theoretical and

practical synthesis capabilities that could be used for developing a synthesis concept The synthesis concept should combine the respective strengths and eliminate the respective weaknesses of each of the three analysis concepts Fundamental analysis behavioral finance and technical analysis are examined in detail Empirical studies should prove if and by which approaches the analysis concept is able to predict future stock prices In order to be able to develop a synthesis concept each analysis concept is evaluated by a SWOT analysis pursuing the objective of determining the respective strengths weaknesses opportunities and threats of the

*Global Stock Market Development* Marcin Kalinowski,2021-09-27 In the current era of globalised financial markets the stock market cannot be assessed solely by comparing quantitative features such as the number of listed companies or capitalisation on the stock exchange This is of secondary importance from an investor s point of view What is important however is how a given stock market behaves towards the environment whether it is hyperactive or excessively lethargic in response to information This book provides an innovative tool for assessing global stock markets It describes the complex concept of stock market development in light of classical and behavioural finance theories and considers both quantitative the number of listed companies turnover etc and behavioural aspects price volatility the behaviour of fundamental indicators of listed companies Based on an innovative method for assessing development the author analyses 130 stock markets indicating those that are more developed in terms of quantity and behaviour Ultimately this enables the assessment of which markets are more or less developed and why This knowledge used properly offers an advantage over other financial market participants and allows for the comprehensive assessment of individual stock markets which can support the process of making good investment decisions The book is an
