**Telling the Story of Translation** Judith Woodsworth,2017-08-10 Scholars have long highlighted the links between translating and re writing increasingly blurring the line between translations and so called original works Less emphasis has been placed on the work of writers who translate and the ways in which they conceptualize or even fictionalize the task of translation This book fills that gap and thus will be of interest to scholars in linguistics translation studies and literary studies Scrutinizing translation through a new lens Judith Woodsworth reveals the sometimes problematic relations between author and translator along with the evolution of the translator s voice and visibility The book investigates the uses and abuses of

translation at the hands of George Bernard Shaw Gertrude Stein and Paul Auster prominent writers who bring into play assorted fictions as they tell their stories of translations Each case is interesting in itself because of the new material analysed and the conclusions reached Translation is seen not only as an exercise and fruitful starting point it is also a way of paying tribute repaying a debt and cementing a friendship Taken together the case studies point the way to a teleology of translation and raise the question what is translation for Shaw Stein and Auster adopt an authorial posture that distinguishes them from other translators They stretch the boundaries of the translation proper their words spilling over into the liminal space of the text in some cases they hijack the act of translation to serve their own ends Through their tales of loss counterfeit and hard labour they cast an occasionally bleak glance at what it means to be a translator Yet they also pay homage to translation and provide fresh insights that continue to manifest themselves in current works of literature By engaging with translation as a literary act in its own right these eminent writers confer greater prestige on what has traditionally been viewed as a subservient art

*Introduction to the Theory of Atomic Spectra* I. I. Sobel'Man, 2016-04-20 *Introduction to the Theory of Atomic Spectra* is a systematic presentation of the theory of atomic spectra based on the modern system of the theory of angular momentum. Many questions which are of interest from the point of view of using spectroscopic methods for investigating various physical phenomena including continuous spectrum radiation excitation of atoms and spectral line broadening are discussed. This volume consists of 11 chapters organized into three sections. After a summary of elementary information on atomic spectra including the hydrogen spectrum and the spectra of multi electron atoms the reader is methodically introduced to angular momentum systematics of the levels of multi electron atoms and hyperfine structure of spectral lines. Relativistic corrections are also given consideration with particular reference to the use of the Dirac equation to determine the stationary states of an electron in an arbitrary electromagnetic field. In addition the book explores the Stark effect and the Zeeman effect the interaction between atoms and an electromagnetic field and broadening of spectral lines. The final chapter is devoted to the problem of atomic excitation by collisions. This book is intended for advanced course university students postgraduate students and scientists working on spectroscopy and spectral analysis and also in the field of theoretical physics

**Love and Sexuality in Social Theory** Emiliano Bevilacqua, Mariano Longo, Michael Hviid Jacobsen, 2024-11-27 *Love and Sexuality in Social Theory* considers the role that love and sexuality play in private and public life. Drawing on both classical and contemporary social theory this book presents both theoretical and empirical studies of love and sexuality as social factors from the earliest reconstructions of modern emotional life to the most recent analyses of liquid love. With attention to the consequences that passions and desires have both on morals and behaviour it departs from the analysis of society in terms of the division of labour and utilitarian mechanisms to consider how a society based on performances values human energy and emotional behaviour in a contradictory way. This book therefore presents and discusses classic authors from Georg Simmel and Pitirim Sorokin to Marianne Weber and Simone De Beauvoir through the work of Erving Goffman and ending with contemporary authors such as Michel Foucault Anthony Giddens Zygmunt Bauman Ulrich Beck and Eva Illouz. By presenting love as the social foundation of altruism an essential element in modern conceptions of subjectivity and a force shaping intimacy and contemporary social

life this book will appeal to scholars of sociology particularly those interested in social theory and the sociology of emotions

Maimonides' "Guide of the Perplexed" in Translation Josef Stern, James T. Robinson, Yonathan Shemesh, 2019-08-15 Moses Maimonides's Guide of the Perplexed is the greatest philosophical text in the history of Jewish thought and a major work of the Middle Ages. For almost all of its history, however, the Guide has been read and commented upon in translation in Hebrew, Latin, Spanish, French, English, and other modern languages rather than in its original Judeo-Arabic. This volume is the first to tell the story of the translations and translators of Maimonides' Guide and its impact in translation on philosophy from the Middle Ages to the present day. A collection of essays by scholars from a range of disciplines, the book unfolds in two parts. The first traces the history of the translations of the Guide from medieval to modern renditions. The second surveys its influence in translation on Latin scholastic, early modern, and contemporary Anglo-American philosophy, as well as its impact in translation on current scholarship. Interdisciplinary in approach, this book will be essential reading for philosophers, historians, and religious studies scholars alike.

Ernst Mach — A Deeper Look J.T. Blackmore, 2012-12-06 Ernst Mach: A Deeper Look has been written to reveal to English-speaking readers the recent revival of interest in Ernst Mach in Europe and Japan. The book is a storehouse of new information on Mach as a philosopher, historian, scientist, and person, containing a number of biographical and philosophical manuscripts published for the first time, along with correspondence and other matters published for the first time in English. The book also provides English translations of Mach's controversies with leading physicists and psychologists such as Max Planck and Carl Stumpf, and offers basic evidence for resolving Mach's position on atomism and Einstein's theory of relativity. Mach's scientific, philosophical, and personal influence in a number of countries—Austria, Germany, Bohemia, and Yugoslavia, among them—has been carefully explored, and many aspects detailed for the first time. All of the articles are eminently readable, especially those written by Mach's sister. They are deeply researched, new interpretations abound, and the bibliography includes recent works by and about Mach from over a dozen countries. The book also contains many articles by or about Mach's contemporaries, including Ostwald, Dingler, Weichert, and especially Einstein. Finally, and most intriguingly, the original ideas of Japanese scholars are presented built on Mach's philosophy. These demonstrate how Mach's world view is currently contributing to the solution of contemporary philosophical problems.
