Occhipinti,2024-11-21 It is a revolutionary indeed heretical book A book about bacteria and life a book about science but fictionalized and with some humorous jokes easy to read and understand and requires no acquired scientific knowledge The essay is divided into three parts In the first part the author offers you a fantastic journey through the history of life where dialogues develop with a Bacterium about the origin of life and with Acritarchus a eukaryote about their origin It continues with Pikaia who reveals a new view of being an animal and with Purgatorius representing mammals and finally with Darwin on natural selection at the dawn of the new millennium The second part highlights the latest findings on the incredible capabilities of bacteria In the third part after a brief return to the past starting from Brandon Carter s anthropic principle and Hoimar von Dierfurth s suggestion us perhaps as a link to a non biological offspring of a whole other species an ideal purpose of life on Earth in relation to the Cosmos and whether there is life in our Galaxy is described Finally Darwin and the author develop a dialogue about the evolution of Sapiens in this period of great technological transformation and our attitude toward new technologies Keep Your Mobile Phone Away or Digest It Alphonse Vanderheyde,2024-10-15 Today s digital
