The Political Economy and Ethics of Debt Financing Patrick O'Sullivan, Paolo Ricci, 2024-12-04 This book takes a fresh look at an age old controversy in ethics and political economy that stretches right back to Aristotle the morality and the economics of debt financing or the charging of interest on loans It endeavours to show the immense relevance of those ancient debates in the contemporary economy Outside of countries which practise Islam and Islamic finance the charging of interest is taken completely for granted today and little or no thought is devoted to its morality or economic and social impacts This book argues that in fact the question of the morality of charging interest is still debatable and deserves to be considered anew in the 21st century for the light it can shine on certain salient contemporary sources of economic malaise This book will first of all review the ancient debates on these questions stretching back to Aristotle seeking to restate the concerns in terms of contemporary economic theories and realities It will also then delve into the current practices in respect of lending of all kinds that can be found in those Islamic countries and financial institutions which endeavour to follow the prohibition of riba charging of any kind of interest This will be contrasted with the impact of interest and debt financing in the contemporary non Islamic economies arguing that debt financing of businesses promotes greater rates of bankruptcy over the business cycle and that the charging of interest on loans for current consumption purposes will over time increase inequality and inequitable concentration of wealth in societies where it is practised It will also be shown how in a system without predetermined interest charges problems of exponentially exploding government debt could largely and neatly be avoided by linking bondholder rewards to levels of fiscal proceeds of states This book will be of significant interest to readers in ethics moral philosophy and political economy as well as to policymakers and thinkers grappling with issues around debt burdens public and private inequality and fairness

The Metropolis in Black and White George C. Galster,2017-07-12 The Metropolis in Black and White highlights a stark fact America s metropolitan areas are more polarized along racial lines than at any time since the mid 1960s Though urban areas have become multicultural the editors argue that black white racial differences will outlast ethnic differences in metropolitan America and that the race issue in most urban areas is perceived as a black white one Galster and Hill perceive that the theme of place power and polarization is most powerful when blacks and whites are contrasted African Americans on average are the poorest most segregated most disadvantaged urban racial or ethnic group because they are deeply entangled in the web of interrelationships connecting place power and polarization Since these interrelationships form a comprehensive

set of social structures that oppress African Americans they can be judged to be racist at their core Race not merely class continues to play a pivotal role in shaping urban African Americans In clear analyses the contributors examine employment income the underclass education housing health and mortality political participation and racial politics Intertwined themes of spatial isolation political empowerment and racial disparities place power and polarization guide the analyses This is a vital text for courses in urban affairs American studies economics geography sociology political science urban planning and racial and ethnic studies In clear analyses the contributors examine employment income the underclass education housing health and mortality political participation and racial politics Intertwined themes of spatial isolation political empowerment and racial disparities place power and polarization guide the analyses This is a vital text for courses in urban affairs American studies economics geography sociology political science urban planning and racial and ethnic studies

Sustainable Rural Transformation Through Agro-Industries U.K. Srivastava, Pramila Srivastava, 2018-01-01 Indian economy is undergoing structural changes The share of agriculture and allied activities in GDP has declined over the years On farm jobs are diminishing or stagnant There is a need to generate off farm jobs through secondary and tertiary processing of agriculture crop horticulture animal husbandry fisheries forest produce raw material and these are not increasing to keep pace with the needs despite potential In India more than 75% of agro processing is done by informal and small enterprises But most informal and small unit suffer from market and technology constraints Therefore they cannot go for higher value addition from the main products and from the by products These informal and small enterprises are not in a position to create an integrated value chain which can have links with the farmers As technology is outmoded these units are not in a position to give quality assurance and meet food safety standards Their products are marketed only in less demanding nearby local markets World over there is transition from informal and small agro industrial enterprises to large units which are competitive in terms of price and quality equitable not exploiting any member of value chain and inclusive treating farmers as strategic business partners rather than adversaries They use latest and innovative technology and have national and international markets for selling their products They enjoy scale economies are able to comply with national and international standards of quality assurance and go for higher level of value addition They can forge linkages with the farmers through contract farming and direct procurement and assure their raw material supply by treating the farmers as strategic business partners But these enterprises require the enabling conditions which make it possible to run the enterprises profitably along with transformation of rural areas Over the years the Government of India and nearly all the State Governments have now created most attractive enabling environment Therefore in our assessment India is poised for a great leap in investments in food processing and marketing The book contains 18 chapters dealing with the entire project cycle of agro industries for sustainable rural transformation The most insightful part is the 12 real life case studies The book would be useful to agro entrepreneurs agro processing industries policy makers bankers management consultants students of agriculture universities cooperative management training institutions and MBA students

The Consequences of Cotton in Antebellum America William J. Phalen, 2014-04-04 In 1846 political economist Karl Marx wrote that without cotton you have no modern industry Indeed before the American Civil War cotton brought wealth power and prosperity to both America and Europe Giant industries in the northern U S extensive shipping networks up and down the Atlantic Coast and to Europe new inventions and revised applications of old machines all sprang from the success of King Cotton This thoughtful study traces the impact of southern cotton on most of the important facets of life in antebellum America including employment international relations agriculture shipping the U S economy Native American relations and the subjugation of humans This one plant fashioned the way of life of the South and profoundly affected the destiny of the entire American people

Economics as Moral Science Bernard Hodgson, 2013-04-17 Economics as Moral Science investigates the problem of the ethical neutrality of mainstream economic theory within the context of the methodology of economics as a science Against the conventional wisdom the author argues that there are serious moral presuppositions to the theory but that economics could still count as a scientific or rational form of inquiry The basic questions addressed the ethical implications of economics its status as a scientific mode of theory construction and the relation between these factors are absolutely fundamental ones for an understanding of contemporary economics the philosophy of the human sciences and our current market culture Moreover the study provides a thorough philosophical analysis of the critical issues at stake from the inside from the credible perspective of a particular but foundational economic theory the neoclassical theory of rational choice
