Spanning 12 chapters, the book explores how targeted instructional interventions grounded in local culture, bilingual approaches, and digital tools can empower English as a Foreign Language (EFL) students in both resource-rich and resource-limited settings. Designed for teachers, researchers, curriculum developers, and education policymakers, this book serves as a roadmap for building more inclusive, effective, and engaging EFL learning experiences in Indonesia. It offers frameworks, case studies, and actionable tools for designing interventions that respond to diverse learner needs.

Local Language Testing Xun Yan, Slobodanka Dimova, April Ginther, 2023-07-18 This book describes language testing practices that exist in the intermediate space between large-scale standardized testing and classroom assessment, an area that is rarely addressed in language testing literature. Drawing empirical research on a variety of languages, the volume discusses local language tests' ability to represent local contexts and values explicitly and purposefully embed test results within instructional practice and provide data for program evaluation and research. Although local testing practices have been grounded in the theoretical principles of language testing, the authors in this volume supplement the theoretical content with practical examples of how local tests can be designed to effectively function within and across different institutional contexts.
