Rural Europe Identity And Change:

Rural Europe Keith Hoggart, Henry Buller, Richard Black, 1995 This book examines the interaction at national and international level of the economic political and social change processes within Europe that are bringing about fundamental transformations in rural areas Although such changes are experienced at a local level they are heavily imbued with a national tone given that European nations possess distinctive visions of their rural areas These rural identities set limits within which economic political and social agents can act Yet these limits are constantly being subjected to strain particularly with the globalization of economic activity and the strengthening impetus for integrated EC policies *Housing in the European Countryside* Nick Gallent, Mark Shucksmith, Mark Tewdwr-Jones, 2003 This book reviews international experience of housing pressure in rural areas in a number of countries **The Future of Europe's Rural Peripheries** Lois

Labrianidis, 2017-11-30 Bringing together case studies from Germany Greece Poland Portugal and the UK this book examines the contribution of entrepreneurial ventures and new technology in stimulating economic development in rural locations It looks at instances of good practice in terms of both public and private initiatives and develops a coherent combination of policy objectives facilitating the long term economic development of the countryside Firstly analyzing the key causes and effects of economic restructuring currently affecting Europe's rural areas the book then explores the consequences that European integration and globalization have had and will have in future It identifies sources of entrepreneurship and examines their distribution between different gender age and other social groupings The book continues to evaluate the extent to which the existing institutional social and technological environment and infrastructure encourages and facilitates entrepreneurship Leadership and Local Power in European Rural Development Imre Kovách, 2017-05-15 Contemporary processes of economic social political and cultural restructuring are having profound impacts on the form and function of rural areas within the countries of the European Union and beyond Furthermore rural development policies and programmes at EU and national levels have been critical in shaping the responses of different rural areas across Europe to these wider processes of restructuring Contrasting empirical studies of ten European countries this volume provides a comprehensive analysis of the restructuring processes and the various national regional and local rural development programmes Adopting a different national perspective in each chapter it focuses particularly on issues of power and leadership in the evolution and administration of these programmes Five broad issues are examined in each case socio economic changes in rural areas the administrative context in which rural development and political activities take place the sociological context the political control of rural development and the use of different discourses of rurality in shaping the development process **Rural Europe** Keith Hoggart, Richard Black, Henry Buller, 2014-02-25 Examines the interaction of the economic political and social change processes within Europe which are bringing about fundamental transformations in rural areas The authors expand on this view of rural Europe and place its significance within the broader field of rural studies **The International Yearbook**

of Environmental and Resource Economics 2000/2001 Tom Tietenberg, Henk Folmer, 2000-05-25 There has been an explosion in the literature and research on environmental and resource economics in recent years This major annual publication provides a cutting edge survey of current research by the leading experts in the field **Interpreting Rurality** Gary Bosworth, Peter Somerville, 2013-10-15 The British countryside is a national institution most people aspire to live there many people use it for leisure and recreation and we can all watch rural life played out on our television screen read about it in novels or consume its imagery in art and cinematography The aim of this book is to explore the way that these aspirations and perceptions influence the way that the term rural is interpreted across different academic disciplines Definitions of rural are not exact leaving room for these interpretations to have a significant impact on the meanings conveyed in different areas of research and across different economic social and spatial contexts In this book contributors present research across a range of subjects allowing critical reflections upon their personal and disciplinary interpretations of rural This resulting volume is a collection of diverse chapters that gives an emergent sense of how the notion of rural changes and blurs as the disciplinary lens is adjusted In drawing together these strands it becomes clear that human relations with rural space morph materiality into highly complex representations wherein both disadvantage and social exclusion persist within a rurality that is also commodified consumed and cherished **Local Responses to Global Integration** Charlabos Kasimis, Apostolos G. Papadopoulos, 2018-12-20 First published in 1999 this volume features articles from 19 contributors on local responses to global integration with a focus on rural areas and their adoption of new functions as both producers and consumers It responds to a crisis in the regulatory framework and reconsiders globality revealing new forms of production and consumption developing in diverse ways amongst these global rural communities Authors from Australia Bulgaria Finland Greece Ireland the Netherlands Poland Sweden the United Kingdom and Venezuela are represented British Environmental Policy and Europe Philip Lowe, Stephen Ward, 2005-08-10 Explores the effectiveness of British organisations and groups in the environmental field in responding to the challenge of European integration *Gender and Rural Geography* Jo Little, 2017-09-29 Gender and Rural Geography explores the relationship between gender and rurality Feminist theory gender relations and sexuality have all become central concerns of geographical research and significant progress has been made in terms of our understanding of both the broad relationship between gender and geography and the more detailed differences in the lives of men and women over space The development of feminist perspectives and the study of gender relations in geography has however been fairly uneven over the discipline Both theoretical and empirical work on gender has tended to be concentrated within social and cultural geography Moreover it has been directed largely towards the urban sphere
