The Arctic has returned with a vengeance as an area of international contention Beginning in 2007 Russia has continued to make aggressive moves and claims regarding territory in the Arctic Ocean These moves undoubtedly have been prompted by global climate change and the importance of energy with which Russia believes the Arctic is lavishly supplied These moves apparently were intended to compel other Arctic states like Norway to come to terms with Russia Nonetheless the tendency to invoke military and security issues and instruments in this region of the world continues apace These essays taken from SSI s 2010 conference on Russia fully explore the Russian and international competition for influence and rights over the
