Making Medical Decisions for the Profoundly Mentally Disabled Norman L. Cantor, 2009-08-21 A legal and moral analysis of medical decision making on behalf of those with such severe cognitive impairments that they cannot exercise self determination In this book Norman Cantor analyzes the legal and moral status of people with profound mental disabilities those with extreme cognitive impairments that prevent their exercise of medical self determination He proposes a legal and moral framework for surrogate medical decision making on their behalf The issues Cantor explores will be of interest to professionals in law medicine psychology philosophy and ethics as well as to parents guardians and health care providers who face perplexing issues in the context of surrogate medical decision making The profoundly mentally disabled are thought by some moral philosophers to lack the minimum cognitive ability for personhood Countering this position Cantor advances both theoretical and practical arguments for according them full legal and moral status He also argues that the concept of intrinsic human dignity should have an integral role in shaping the bounds of surrogate decision making Thus he claims while profoundly mentally disabled persons are not entitled to make their own medical decisions respect for intrinsic human dignity dictates their right to have a conscientious surrogate make medical decisions on their behalf Cantor discusses the criteria that bind such surrogates He asserts contrary to popular wisdom that the best interests of the disabled person are not always the determinative standard the interests of family or others can sometimes be considered Surrogates may even consistent with the intrinsic human dignity standard sometimes authorize tissue donation or participation in nontherapeutic medical research by profoundly disabled persons Intrinsic human dignity limits the occasions for such decisions and dictates close attention to the preferences and feelings of the profoundly disabled persons themselves Cantor also analyzes the underlying philosophical rationale that makes these decision making criteria consistent with law and morals **Resources**

Money and Transportation in Maryland, 1720-1765 Clarence Pembroke Gould, 1915 God's Economy Lew Daly, 2009-12-15 President Obama has signaled a sharp break from many Bush Administration policies but he remains committed to federal support for religious social service providers Like George W Bush's faith based initiative though Obama's version of the policy has generated loud criticism from both sides of the aisle even as the communities that stand to benefit suffer through an ailing economy God's Economy reveals that virtually all of the critics as well as many supporters have long misunderstood both the true implications of faith based partnerships and their unique potential for advancing social justice Unearthing the intellectual history of the faith based initiative Lew Daly locates its roots in the pluralist tradition of Europe's Christian democracies in which the state shares sovereignty with social institutions He argues that Catholic and Dutch Calvinist ideas played a crucial role in the evolution of this tradition as churches across nineteenth century Europe developed philosophical and legal defenses to protect their education and social programs against ascendant governments Tracing the influence of this heritage on the past three decades of American social policy and church state law Daly finally untangles the radical beginnings of the faith based initiative In the process he frees it from the narrow culture war framework that has limited debate on the subject since Bush opened the White House Office for Faith Based and Community Initiatives in 2001 A major contribution from an important new voice at the intersection of religion and politics God's Economy points the way toward policymaking that combines strong social support with a new moral focus on the protection of families and communities
