Kramer, 2016-08-11 Kramer was one of the most visionary musical thinkers of the second half of the 20th century In his *The Time of Music* he approached the idea of the many different ways that time itself is articulated musically This book has become influential among composers theorists and aestheticians Now in his almost completed text written before his untimely death in 2004 he examines the concept of postmodernism in music Kramer created a series of markers by which we can identify postmodern works He suggests that the postmodern project actually creates a radically different relationship

between the composer and listener Written with wit precision and at times playfully subverting traditional tropes to make a very serious point about this difference Postmodern Music Postmodern Listening leads us to a strongly grounded intellectual basis for stylistic description and an intuitive sensibility of what postmodernism in music entails Postmodern Music Postmodern Listening is an examination of how musical postmodernism is not just a style or movement but a fundamental shift in the relationship between composer and listener The result is a multifaceted and provocative look at a critical turning point in music history one whose implications we are only just beginning to understand Educational Psychology Steven R.
