Rwanda: Rebuilding of a Nation A Ndahiro,J. Rwagatare,2015-12-01 Rwanda Rebuilding of a Nation is a story that takes the reader through a sweeping panorama of Rwandas history from its recent past as a nearfailed state to its present as a beacon of hope and successful innovations Rwandas rise from the ashes detailed in this book is the culmination of a visionary and laborious process of rebuilding a nation from the brink of collapse It is also a story of reconciling a people that had been taught to see each other as enemies Twenty years ago the world wrote off Rwanda after the worst genocide in recent times left over one million of its people dead and another three million in refugee camps in neighbouring countries The country was broken in every way possible socially culturally economically and politically Today Rwanda has been rebuilt and has become a respectable country receiving many international accolades for its extraordinary leadership and achievements The backbone and custodian of this agenda has been and remains the Rwanda Patriotic Front RPF This was the case right from its inception before and during the liberation struggle to the implementation of this transformation The book traces the success of the RPF driven transformation which derives from the combination of three interrelated factors First a people centred governance that has spearheaded community development ownership and accountability Second home grown initiatives in different sectors that have helped to adequately respond to extraordinary challenges And third a visionary leadership that listens to its people and inspires them towards self reliance and dignity Finally the book shows that Rwandas achievements have been possible because the RPFs development agenda is built on power sharing consensus building gender equality and the primacy of security *Imaging and Assessing Mobile Technology for Development* Richard Musabe,John Sören Pettersson,2024-04-08 Imaging and assessing mobile technology for development M4D means understanding the use of appropriate technologies and services and how they directly or indirectly address socio economic challenges This book adopts various perspectives to identify the obstacles to affordable digital technologies in order to enable enhance and effect development The book plays on the tension between success reports and optimistic projections on one hand and empirical evidence of technological belly splash on the other hand The areas covered include infusion of service education in computing education the Rwandan establishment of African Centres of Excellence to promote the development of appropriate technology the metaverse s realisation in a mobile network enabled metaversity and difficulties detected when evaluating digitisation of distance learning students security awareness dissemination of agricultural information and mobile payment The decolonisation of community based media and attempts to step outside the mobile network and Internet are also covered

Mathematics Education in East Africa Anjum Halai,Geoff Tennant,2016-03-08 This Open Access book is a valuable resource for policymakers and practitioners as it brings insights mainly from developing countries where relatively less research activity takes place It is also a valuable resource for courses in mathematics education in the teacher education colleges and departments of education in the sub Saharan Africa region In the increasingly global and technological world

mathematics is seen as a significant gatekeeper of opportunities for social and economic advancement and mobility Hence countries and development agencies in the broader sub Saharan Africa region are looking towards increasing access to relevant and high quality secondary education as a lever towards economic development Policy makers and other key decision makers in education look towards improvement in mathematics teaching and learning as a key focus in education reform In the East Africa region also a number of initiatives have been taken at the national level in the respective countries to improve the quality of mathematics education This book provides an in depth comparative analysis of the developments and issues in mathematics education in Kenya Tanzania Rwanda and Uganda and advances our understanding of the state of secondary mathematics education in East Africa EFL Writing Teacher Education and Professional Development Estela Ene,Betsy Gilliland,Sarah Henderson Lee,Tanita Saenkhum,Lisya Seloni,2024-04-16 This book explores how EFL writing teacher education is theoretically pedagogically methodologically and sociopolitically shaped given teachers unique local contexts and circumstances It showcases practitioners and researchers teaching in or studying geographic areas that have as yet been under represented in international publications and it focuses on ways that specific contexts create unique opportunities and constraints on what developing teachers know and do in their work The chapters prioritize local voices and materials to build a more inclusive and comprehensive picture of L2 writing globally enabling the book as a whole to both document and further shape pedagogical approaches to L2 writing Readers will be able to use the unique insights contained in this book in their own classrooms and professional development activities The Foreign Service Personnel System at the Department of State United States. Congress. House. Committee on Foreign Affairs. Subcommittee on International Operations,1990 Reimagining Nigeria's Educational System Joseph A. Balogun,2023-09-20 This book assesses the challenges within the Nigerian educational system and provides a concrete plan to revitalize the low performing system by strengthening high stakes testing at all levels In Nigeria many citizens believe that the solution to the country s low performance in education is to eliminate high stakes standardized testing High stakes testing refers to applying standardized student achievement tests as a primary mechanism to evaluate students teachers and their school s performance This book argues that the poor quality of education and low ranking of Nigeria s educational system is not related to the negative consequences of high stakes testing but rather is due to many intrinsic factors By conducting a comparative analysis of six high performing education systems worldwide the book offers a comparative summative evaluation of the educational system and offers recommendations This book will be of interest to policymakers and scholars in the fields of African education higher education quality and global studies African studies management and administration leadership and professional development studies Joseph Abiodun Balogun is former Dean and retired Distinguished University Professor at the College of Health Sciences Chicago State University USA Visiting Professor Program Consultant at the Centre of Excellence in Reproductive Health Innovation University of Benin Nigeria and President CEO Joseph Rehabilitation Center Tinley Park

The Orderly Entrepreneur Catherine A. Honeyman,2016-09-14 The first generation of children born after Rwanda s 1994 genocide is just now reaching maturity setting aside their school uniforms to take up adult roles in Rwandan society and the economy At the same time Rwanda s post war government has begun to shrug off international aid as it pursues an increasingly independent path of business friendly yet strongly state regulated social and economic development The Orderly Entrepreneur tells the story of a new Rwanda now at the vanguard among developing countries emulating the policies of Singapore Korea and China and devoutly committed to entrepreneurship as a beacon for 21st century economic growth Drawing on ethnographic research with nearly 500 participants The Orderly Entrepreneur investigates the impact and reception of the Rwandan government s multiyear entrepreneurship curriculum first implemented in 2007 as required learning in all secondary schools As Honeyman shows entrepreneurship is more than a benign buzzword or hopeful panacea for economic development but a complex ideal with unique meanings across Rwandan society She reveals how curriculum developers teachers and students all brought their own interpretations and influence to the new entrepreneurship curriculum exposing how even a carefully engineered project of social transformation can be full of indeterminacies and surprising twists every step of the way
