Contested Karoo: Interdisciplinary perspectives on change and continuity in South Africa's drylands Cheryl Walker, M Timm Hoffman, 2024-05-15 This interdisciplinary collection explores significant land use changes in South Africa's semi arid Karoo region and their implications for social justice and the environment across different scales It brings together recent scholarship by established and younger researchers in both the social and the natural sciences to examine the ways in which the Karoo is being reconfigured as a new resource frontier and the tensions and contestations that result Along with ongoing mining major investments in astronomy notably the Square Kilometre Array radio telescope in renewable and non renewable sources of energy solar wind potential shale gas mining in biodiversity conservation and commercial game farming are reshaping land use and authority in this vast and long marginalised area While promising significant benefits to society at large these developments are built on older histories of dispossession and extractivism histories that many Karoo residents fear are being reproduced in new forms today Collectively these dynamics place this unique region at the centre of national and global concerns around climate change the politics of knowledge production the conservation of threatened biodiversity and the meaning and possibility of sustainable development These issues are explored through a series of case studies of selected developments complemented by chapters providing more historical context and general overviews While challenging perceptions of this region as a peripheral wasteland this collection raises conceptual and policy questions that resonate far beyond the Karoo itself It also highlights the importance of interdisciplinary collaboration in research aimed not only at understanding but also at responding appropriately to the mounting challenges of our time

The Education We

Need for a Future We Can't Predict Thomas Hatch, Jordan Corson, Sarah Gerth van den Berg, 2021-01-16 Improve Schools and Transform Education In order for educational systems to change we must reevaluate deep seated beliefs about learning teaching schooling and race that perpetuate inequitable opportunities and outcomes Hatch Corson and Gerth van den Berg challenge the narrative when it comes to the grammar of schooling or the conventional structures practices and beliefs that define educational experiences for so many children to cast a new vision of what school could be The book addresses current systemic problems and solutions as it Highlights global examples of successful school change Describes strategies that improve educational opportunities and performance Explores promising approaches in developing new learning opportunities Outlines conditions for supporting wide scale educational improvement This provocative book approaches education reform by highlighting what works while also demonstrating what can be accomplished if we redefine conventional schools We can make the schools we have more efficient more effective and more equitable all while creating powerful opportunities to support all aspects of students development You won't find a better book on system change in education than this one We learn why schools don't change how they can improve what it takes to change a system and in the final analysis the possibilities of system change Above all The Education We Need renders complexity into clarity as the writing is so clear and compelling A powerful read on a topic of utmost importance Michael Fullan Professor Emeritus OISE University of Toronto I cannot recommend this book highly enough Tom tackles long standing and emerging educational issues in new ways with an impressive understanding of the challenging complexities but also feasible possibilities for ensuring excellence and equity for all students Carol Campbell Associate Professor Ontario Institute for Studies in Education University of Toronto *Pursuit of Liberation* Emily A. Nemeth, Ashley N. Patterson, 2022-04-01 The authors of this volume collectively demonstrate the importance of critical service learning in this historic moment as we participate in and witness ongoing struggles for justice around the world The contributors of this volume offer guidance to educators and scholars alike who are interested in designing participating in and studying the potential of alliances formed through critical service learning The volume emphasizes theoretical and historical foundations of critical service learning pressing questions facing the field exploration of outcomes of and ongoing challenges for the pedagogy and design features and larger scale models of critical service learning that can be implemented across the educational landscape of elementary secondary and higher education ENDORSEMENTS This volume in the Advances in Service Learning Research series does not disappoint Emily Nemeth and Ashley Patterson have amassed an amazing team of authors who take readers on a rewarding journey across diverse cultural communities and educational contexts revealing the limitations of traditional service learning approaches in addressing issues of racial injustice Readers of this volume will gain a greater understanding of the rapidly evolving and maturing nature of higher education service learning pedagogy and the need to adopt more critical perspectives in the study and practice of service learning Andrew Furco University of Minnesota Pursuit of Liberation conceived and written during tumultuous times in the

United States offers hope for the possibility of social justice and liberation in educational spaces The modern day brutal lynching of George Floyd an African American man by a white police officer and the COVID 19 pandemic revealed the horridness and inhumanity of a country that advertises itself as a beacon of equity and inclusion This volume is a reminder that social justice and liberation require vigilance The editors Professors Nemeth and Patterson persuade us to understand that the work of inclusion and liberation in education is complex multidisciplinary continuous and iterative Most importantly they convincingly assert that communities and educational institutions need to take bold steps toward a more just hopeful and loving world through critical service learning Shirley Mthethwa Sommers University of Mpumalanga *Advancements in Urban Environmental Studies* Atiqur Rahman, Shouraseni Sen Roy, Swapan Talukdar, Shahfahad, 2023-03-03 According to UN estimates approximately nearly half of the world's population now lives in cities and that figure is expected to rise to almost 70% by 2050 Cities now account for around 70% of worldwide greenhouse gas emissions and this percentage is predicted to rise in the near future as a result of projected increases in global urbanization patterns It is widely acknowledged that irrational urban planning and design can increase emissions while also exacerbating threats and risks resulting in a slew of environmental issues such as urban heat islands air pollution flooding amongst other issues as well as environmental social and economic losses Therefore these concerns must be addressed promptly in order to cope up with these rising difficulties and make urban environments safer for residents With the advancement of remote sensing technology and the use of current remote observation systems urban data science remote sensing and artificial intelligence AI modeling and quantifying emergent difficulties in urban regions and urban systems have become easy They aid in the quantitative analysis of urban shape functions and human behavior in cities Harvesting data developing models and suggesting new methodologies will be aided by combining urban ecology with new breakthroughs in data science This book is of great value to a diverse group of academicians scientists students environmentalists meteorologists urban planners remote sensing and GIS experts with a common interest in geospatial sciences within the earth environmental sciences as well as human and social sciences *Teaching and Learning in an Era of Change* ,1997 **Educational Leadership and Critical Realism** Anthony Thorpe, Jean Pierre Elonga Mboyo, 2025-09-18 Adopting a critical realist approach to educational leadership this book shows how applied theory can contribute to the development of mechanisms allowing for the effective leadership of organisations Through an examination of pertinent theories and debates in educational leadership and critical realist thought it moves to offer demonstrations of practical uses of critical realism that include the transformation of reflective practice the development and practice of leadership and the formulation as well as the enactment of policy Considering the role that realist thought can play in the resolution of educational crises in sub Saharan Africa and bridging the gap between research and practice the authors argue that change is possible and that it can be initiated from within the field of educational leadership Centred on a vision of social justice for human flourishing instead of operating within narrow

and mechanistic pre occupations Educational Leadership and Critical Realism will appeal to scholars across the social sciences as well as to practitioners and policymakers in the field of education

Kong, 2015-10-30 Like many countries around the world China has been implementing policies aimed at improving parent school relationships However unlike many developed countries the historical context of family school relationships has been limited and parents typically do not participate in the school context Until now there has been little research conducted in rural China on parental involvement in their children's education This book investigates the nature of parental involvement in primary children's education in rural China by using a combination of quantitative and qualitative methods It outlines the layered strategies of how rural parents are involved in their children's schooling showing that rural parents strongly desire educational success for their children and view education as a means to their children gaining social mobility It demonstrates that few rural parents engage in visible forms of parental involvement in their children's schools such as attending parent teacher meetings Rather they are more likely to engage strategies to support their children's education which are largely invisible to schools It adds to the growing body of parental involvement research that suggests that culture location and socio economic status influence different forms of parental involvement and highlights nuances in invisible forms of parental involvement Providing insights into how poor rural parents envision their role with their children schools and the larger society and how these relationships can affect the social mobility of students and families this book will be of huge interest to students and scholars of Asian education comparative and international education and Chinese society *Eurosoil 2021: Sustainable management of soil functions as a basis to avoid, halt, and reverse land degradation* Jörg Luster, Thomas Keller, Miriam Muñoz-Rojas, Lucy Crockford, Ute Wollschläger, 2023-03-13
