Process Systems Analysis and Control Steven E. LeBlanc, Donald Coughanowr, 2009 *Process Systems Analysis and Control* third edition retains the clarity of presentation for which this book is well known It is an ideal teaching and learning tool for a semester long undergraduate chemical engineering course in process dynamics and control It avoids the encyclopedic approach of many other texts on this topic Computer examples using MATLAB and Simulink have been introduced throughout the book to supplement and enhance standard hand solved examples These packages allow the easy construction of block diagrams and quick analysis of control concepts to enable the student to explore what if type problems that would be much more difficult and time consuming by hand *Catalog of Copyright Entries.
