Faith Based Social Services Measures Assessments and Effectiveness explains the nature and quality of religion based social service delivery while serving as a point of reference for future research and work. This unique source tackles the important complex issue of measuring the effectiveness of faith based social services in comparison to secular services while providing analysis of the latest available studies. The latest empirical research is detailed including the problems found when comparing secular and faith based social service providers, their organizational structures and the types of services offered. Analysis is included of the data from a three state evaluation of welfare to work programs, a study of four types of faith based services found in four cities and an assessment of a church based program for teenage drop outs. Topics in Faith Based Social Services Measures Assessments and Effectiveness include discussion on how social science research shunned faith based services and how this neglect affected effectiveness, problems inherent in efficacy assessment, making funding priorities decisions, the causes of outcome differences, a model of evaluation based on randomized controlled clinical trials using measurement practices currently used by the nonprofit sector, comparative case studies in transitional housing, parent education and residential substance abuse treatment programs, latest analysis of research involving faith based organizations and the provided services, efficacy much more.
