Integrating Literacy and Math Ellen Fogelberg, Carole Skalinder, Patti Satz, Barbara Hiller, Lisa Bernstein, Sandra Vitantonio, 2013-10-15 Many K 6 teachers and students still think of mathematics as a totally separate subject from literacy. Yet incorporating math content into the language arts block helps students gain skills for reading many kinds of texts. And bringing reading, writing, and talking into the math classroom supports the development of conceptual knowledge and problem solving in addition to computational skills. This invaluable book thoroughly explains integrated instruction and gives teachers the tools to make it a reality. Grounded in current best practices for both language arts and math, the book includes planning advice, learning activities, assessment strategies, reproducibles, and resources, plus a wealth of examples from actual classrooms.

The Math Coach Field Guide Marilyn Burns, 2006 Math coaches and specialists assigned the task of improving mathematics instruction face an enormous and complex challenge. Most coaches take on the responsibility with a title and a charge but seldom with a road map. *The Math Coach Field Guide: Charting Your Course* provides just the kind of guidance needed to help coaches in this demanding and often undefined role as they strive to support teachers in their teaching of math. In this collection of 11 essays, veteran math coaches share their expertise, providing glimpses into the unique trials, false starts, and successes they have experienced on their position.

Each chapter includes key concepts based on NCTM and state math standards, math vocabulary resources, and literature links. Suggested materials to include at each station for the corresponding math content strand, ideas for modeling, troubleshooting, differentiating, and assessment, and reflection questions for professional development. Throughout the book, Debbie has included hundreds of color photos showing math work stations in action from a variety of classrooms in which she has worked.
